# VICTORYTURF®

VictoryTurf® is a dual fiber synthetic turf system designed to provide balanced performance for multiple sports. Short nylon fibers create a Spike Zone®, which provides cushioning for the athlete and support for the taller polyethylene fibers. The taller fibers give the surface its softness and grass-like appearance. Indoors or outdoors, VictoryTurf provides optimum performance for multi-sport fields, including lacrosse, football, soccer, baseball, and field hockey.

- Low pile-height provides excellent playing characteristics for football, lacrosse, soccer, baseball and field hockey
- Can be used with or without infill
- Excellent results during vertical deformation testing signify lower levels of muscle fatigue in athletes
- Can be used with a separate pad system

**VictoryTurf** is the ideal surface for multi-sport use. The nylon Spike Zone helps trap the infill to prevent fly-out.

All of our systems are designed around 6 critical performance tests.
