Heartworm Preventative: Yes No Unknown

Seizures: Yes No Unknown

Reason for today's visit: _____

List ALL medications taken in the last 30 days: _____

List ALL previous surgeries: _____

Primary Veterinary Clinic: _____ Phone (_____)

Dr. Lewis recommends that all patients be spayed or neutered in order to promote a longer, healthier life. Spaying and neutering reduces or eliminates the odds of breast cancer and dangerous uterine infections in females and prostate problems and testicular cancer in males.

If your dog or cat is intact and you would like to have them spayed or neutered in conjunction with one of our procedures, we can perform this at the same time for a minimal cost.

From time to time we like to highlight patients on social media. Would you consent to having your pet's picture featured on our Website and/or Facebook page? (circle one) YES NO
