

I am a very active 55 year old grandma who had a history of headaches and migraines for over 30 years. I was given Zebutal for my migraines and I was taking 6-8 excedrin migraine a day until vertigo set in with the room spinning and the dizziness put me down for 5 weeks. I was sent to a Dr to test my thyroid. Came back negative. Emergency room gave me several pain medicines - did not work. Went to Balance Point for different test. Came (back) negative. Finally I was referred to Dr. Sanders by Dr. Gutt and he was my miracle! I am on amitriptyline 25 mg and I feel like a new person with a new life. I went from 6-8 excedrin down to zero or maybe 2 once in awhile. I can't thank Dr. Sanders enough. I also get more sleep! It is a great feeling! Thank u Dr Sanders.
