

Launchers & Receivers

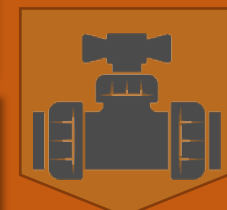

Equipment that is temporarily installed to perform pigging operations. Ensures safe and rapid launching/receiving of in-line tools through a pipeline system.

2" – 36"
Launchers & Receivers
Available

We build Units that are designed from field experience with ergonomics, dependability and quality in mind.

Mainline Valves are pressure tested to ensure the launching/receiving of in-line tools can be done safely by the Operator.

All Launchers & Receivers come fitted with industry grade ports and valves to ensure the fast and efficient pressuring up and blowing down of the Barrels/Pipeline System, making the process of running in-line tools safe and efficient.

It all starts with a phone call.
