About the Event

As we are all aligned to the digital world in unprecedented ways and are more interconnected than ever, with this digital evolution the demand for Cyber Security strategies continues to evolve and the industry must take proactive steps toward OT cyber resilience and protect critical infrastructure. To support this, ISA Delhi Section is pleased to announce a One-Day Program on Cybersecurity, to be held at the SCOPE Complex Auditorium, Lodhi Road, New Delhi – with a theme of: **Converge. Secure. Sustain: Cybersecurity for the OT Driven Future.**

The program aims to foster Cyber Security competency among the participants through practical insights, application-based presentations and real-life case studies to enable application of these learnings to their organizational setting. The program is tailored for stakeholders in Industrial Automation Technology, professionals who plays key role in driving IT and OT optimization across diverse industry domains in the public and private sectors.

This conference cum exhibition will cover various aspects of INDUSTRIAL CYBER SECURITY, an understanding of the threats facing a company, the elements of building a strong security architecture, tactical guidance on identifying threats/pitfalls, and an explanation of the regulatory and legal environment relating to cyber assets, security and resources.

ABOUT ISA: International Society of Automation (ISA) USA is a global non-profit society with more than 35,000 automation professionals worldwide. In the field of cyber-security, ISA has a long history in the development of standards. Today, the ISA/IEC 62443 series of standards define requirements and processes for implementing and maintaining secure Industrial Automation & Control Systems (IACS).

The event is designed for senior and middle managers in both IT and non-IT roles who are engaged in enhancing security measures in their organizations. Eminent speakers and Industry experts will also appraise and guide the participants for the effective cyber security compliance requirements and implementations.

This Conference cum Exhibition will be a great opportunity for:

- Policy makers,
- Regulators and Decision makers,
- CII asset owners,
- Service providers and Product suppliers,
- Industrial Automation fraternity
- Academia and researchers, consulting firms and entrepreneurs

Glimpses of Cyber Security Conference 2024
