

Baseball Field Rehabilitation

As you may remember, the town received a large donation to update the ball field last year and we have been working hard on getting it done this summer. The backstop and fencing have been replaced and our next step is grading/replacing the soil for the in-field. We will work on installing dugouts after the infield is complete. If funds allow, we will work on the outfield, storage and obtaining bleachers/seating.

We are happy to accept additional donations if our residents feel so inclined!
