

# Counting: Keeping Children Safe

The first and most important skill is to learn how to count children

- As I enter the classroom, I will take a few minutes to make sure that the check-in system is \_\_\_\_\_ and that the children on the list match the children in my class
- Every child must be \_\_\_\_\_ at every moment of the day and it is \_\_\_ responsibility to know how many and which children are in my class.
- I will \_\_\_\_\_ the children when changing classrooms.
- I will always keep the attendance list \_\_\_\_\_ so I can check children in and out as they are dropped off and picked up.
- I will count the children every \_\_\_ minutes throughout the day.
- I will count children as I go through every \_\_\_\_\_ and around every \_\_\_\_\_.
- I will know \_\_\_\_\_ and not just how many children are in my class.
- A \_\_\_\_\_ is appropriate for preschool age children.
- If there are two teachers, \_\_\_\_\_ will count the children as they line up.
- It is important to \_\_\_\_\_ the classroom count every time it changes.
- A helpful way to count when children are lining up is to \_\_\_\_\_ while I count them.
