## EXTRA THICK WASHERS

- Designed for high performance in the most rugged environments.
- Through hardened carbon steel.
- Zinc plated finish protects against rust and corrosion.
- Extra thickness helps to prevent splitting, bellying and dishing.
- Eliminates bolt failure caused by ordinary flat washers “dishing out” and allowing assembly to vibrate loose.

## EXTERNAL LOCK WASHERS

- Cadmium plated to protect against rust and corrosion.
- Should be used when maximum holding power is needed.
- Heads should be large enough to contact the teeth, such as round, pan and binding heads.
