

## **SB 899 Ensures Physicians and Other Health Care Providers are Provided Immunity Regarding Medical Liability Due to COVID-19**

**May 14, 2020**

Michigan changed on March 10, 2020.

On that day, our state had its first two cases of COVID-19 and nothing has been the least bit normal since.

For the past few months, physicians and health care providers across the state have worked tirelessly to better understand this novel coronavirus and treat the afflicted who are suffering. Health care providers are doing their best every day to adapt to the fluid and rapidly changing circumstances surrounding this pandemic, all the while risking their lives and the lives of their families along the way.

Physicians everywhere are doing their absolute best to provide quality care during an extremely challenging and nearly unprecedented time, and at the very least, they deserve the protection they need given these extenuating circumstances.

SB 899 provides that protection - legislation that ensures physicians and other health care providers responding to the coronavirus pandemic are provided immunity regarding medical liability while working through these extremely challenging and nearly unprecedented times.

It's the support and protection Michigan's health care community needs and deserves.
