

A NEW AGE OF DOMINATION

#SCIENCEOFDOMINATION

INTRODUCING THE ALL-NEW

WITH **TEKTONIC PLATE 3DM SYSTEM**

Built for the Future of Football.

The F7 hits the football field sporting an advanced Three Dimensional Movement System (3DM). To improve the management of rotational energy and impact absorption, we've incorporated strategically placed Tektonic Plates onto the shell. These movable plates, along with four additional layers of protection create the ultimate energy management system.

Built for Performance.

We've redesigned and reinforced our renowned "raised brow" faceguard for the F7, improving its impact dispersion capability. The F7 also comes equipped with an all new "Rapid Release System," comprised of our patented twist release retainer, and all new EZ Clips on the sides of the helmet.

Built for Protection.

TPU Cushioning is used throughout the helmet. TPU Cushioning has been proven to absorb more impact across a wider variety of temperatures than any other football helmet. The F7 features the all-new Helmet Stabilization System, which enhances performance through better fit.

Built for Players.

The helmet that's best for any player is the helmet that fits him the best. Schutt helmets are legendary for their comfort and fit, thanks to features like the SUREFIT air liner. The Helmet Stabilization System frames your face and gives you a secure, "locked in" feel inside the helmet. Air flow inside the helmet is enhanced with the open sided TPU Cushions.
