**Bob Dickey has decided to work for his nephew, Meredith, to help him with their new business venture. Bob subcontracted several jobs from us in the nineties before coming to work full time in April of 1999. We appreciate his years of service very much. He is a highly skilled carpenter and a super person to work with. We wish him the very best in all his future endeavors.**

## Workplace Accidents

### Accidents In The Workplace And How To Prevent Them

This is a list of the *most common accidents in the workplace*. Knowing what accidents occur the most will help you become more aware of what can easily happen.

- Slips, Trips And Falls are some of the biggest problems at all jobs. While they are technically three different accidents they are often grouped together as one large problem. Slips, trips and falls can often result in serious injuries. You could do anything from pulling a muscle to breaking bones. There are several ways to reduce this types of injuries. Use signs to warn other workers of wet floors will help stop slips as well as keeping papers off of the floors. Make sure all walkways are always clean and clear to reduce trips and falls. Never run wires or cords across high traffic areas.
- Electrical accidents can be extremely dangerous. If the electric volt is high enough it can kill a person. Also many fires in the workplace are caused by faulty electrical wiring. You can prevent electrocution by check all cords for frays or tears before you plug them in. This will also reduce the chance of a fire starting. Never have drinks near electrical equipment they could spill and cause the wire to short out.
- Manual handling injuries often include lifting, pushing, lowering, carrying and several other types of strenuous movements. This types of injuries can damage muscles and tissues in your body. They are most common in the back area. If something is to heavy for you to move alone find help or use a machine to get the job done correctly and safely.

These are just the **top three most common accidents in the workplace**.

## Important Dates

<p>May 11</p>  <p>Mother's Day</p>	<p>Lindsey's Construction will be closed Monday, May 26th in observance of Memorial Day</p>	<p>May 26</p>  <p>Memorial Day</p>
---	---	---

<p><b>Galloway Home</b></p> <p>Their home is almost closed up. We are roughing in mechanicals and nearly ready for drywall and brick to start while we work on soffit and gables.</p>	<p><b>French Lick Family Medicine</b></p> <p>Pouring concrete back on interior &amp; ready to start framing. Rain will hinder us this last week of April but as soon as it dries out we will start stone work.</p>	<p><b>Lake Home</b></p> <p>Cabinets are done, measuring for tops. Need to install vanities, finish wall covering and painting. Tile and carpet start this week. The owner wants us to be completed before Memorial Day weekend.</p>
