

Olde Vineyard Homeowners Assn

Renovation and Construction Approval

Homeowners do not need to contact the HOA regarding outside work when maintaining, painting, or replacing roofs with the same materials and colors. If changes are planned, to ensure Covenant compatibility, please use the following guide.

1. Contact the HOA & the City of Clinton for approval.
2. Owner or contractor should provide to the HOA all proposed construction information.
3. Use the HOA form to share your specific plans, including diagrams, location, planned materials and colors.
4. If homeowner plans to use a construction professional or contractor, provide name and contact information.

It is very important for work done to comply with HOA Protective Covenants before work begins. The HOA and the City will send you approval so you will know your project complies with City and HOA codes and covenants.

Send this information to the HOA by mail or email.

You may contact the City of Clinton at 601-924-2256 or by email at redwards@clintonms.org.
