Hib Lindsey, March 11, 1935 - December 11, 2013

Our founder, my father, passed away December 11th. Many of you had the opportunity to have worked along side Hib and know all about his work ethics. For those of you that didn't, I'm sure you've heard and don't know what you missed. Dad & mom had two children, Susie and myself. We know that he also had a third baby and that was "Lindsey's Lumber & Builders Supply, Inc." Hib cared a great deal about the business and survived many hard times. I know he's looking down with pride to see what we are achieving during this difficult time. I want to thank all my

employees for stepping up to help. I have noticed the extra effort and am grateful for my "work family" as I try and make it through these difficult times.

*God bless,
Mark*

Just a Reminder

W-2 forms will be mailed out in January. Please make sure that your social security number and address are correct with the office.

Lesson in Ladders

Ladders are used in most construction work. They provide us with a means of reaching locations too high to reach otherwise. They allow us to go down into trenches and excavations easily, and ladders help us gain access to the upper floors- and roofs of buildings. Let's define a ladder as a very useful appliance consisting of two side rails joined at regular intervals by cross-pieces called steps, rungs or cleats, on which a person may step when ascending or descending from a given level. In other words it's two pieces of lumber with rungs attached used to climb up and down.

Are you familiar with the various types of ladders? There are Fixed Ladders, Extension Ladders, and Step Ladders. These ladders can be made of aluminum, wood, metal, plastic or fiberglass. Fixed Ladders are attached to a structure and not adjustable in length. An Extension Ladder is a non-self supporting, portable ladder that is adjustable in length. Then there are Step Ladders which are self supporting portable ladders that are not adjustable in length. When selecting a ladder you should consider the capacity of the ladder, its height and footing requirements, and whether it will be used inside or outside.

Check the rungs on fixed ladders for damage and be sure they are securely attached before you climb.

Project Updates

Lost River Rural Fire Dept.

Scott, Kevin & Mike Morgan are putting the spot shine on it. Final walk thru on Dec. 23rd.

Floyds Knobs "Booster Station"

Waiting on Layne to call for us to start Phase 2.

"New" Springs Valley Bank & Trust

Everyone is working hard to complete on time but Mother Nature is not helping us much. I fear we will fall short on some exterior items.

Galloway Home

Trusses arrived on site Dec. 16th. I hope we can get them set and have a dry place to work.

Smoot's Home

We have had this small job a while. The Smoot's have been very patient.

Alysworth Greenhouse

Finishing soon.

Murdock Home

Complete soon.

Upcoming Bids

B. R. Associates, Steakhouse
Hoosier Hills , Paoli

"It's true hard work never killed anybody, but I figure why take the chance?"

-- Ronald Reagan
