

When I first came to your office I was very skeptical. But I must say Dr. Sanders and staff, especially Stephanie Ford, was a wonderful experience. I couldn't say enough good things about her. It was a lot longer process than I ever imagined. But in the end, it really seems worth it. It has taught me how fragile the human body can be. I would not wish labyrinthitis on even my worst enemy. I can not say "thank you" enough. Thank you!
