Sleep Sales, LLC

The world of *Home Sleep Testing* is growing at an accelerated rate, One of the main factors for this growth is due to the introduction of *Testing for Sleep Apnea* in the *Primary Care* and *Ambulatory Surgery Setting*, as this shift begins to emerge, more providers will now have the ability to screen and test their patients for Sleep Apnea.

There clearly is a need to begin screening your patients, Research studies and Clinical trials are being conducted and identifying new affiliations among *Obstructive Sleep Apnea* with very serious health issues.

... Because Everyone's Dream Counts

The SleepViewSM Portal Advantage

The SleepViewSM Portal is a secure, HIPAA compliant, web-based tool that offers:

- Cloud Based Software specifically designed for Health Care facilities with multiple locations.
- Scoring of sleep study by register polysomnographic technologist.
- Interpretation and recommendation of treatment from board-certified sleep physician licensed in your state
- Consistent and timely delivery of professional sleep study reports that can be printed or easily saved into most EMRs or EHRs
- Centralized management of patient sleep studies and reports stored in a private and safeguard database
- Access to patient education, office visit screening tools (Epworth and Mallampti Scales, STOP-BANG Chart and sleep questionnaire
- Complimentary software upgrades and support for SleepViewSM Portal
- Webinar training for initial setup use and of the SleepViewTM system

SLEEPVIEW'S® DEDICATED 8 CHANNELS

1. Respiratory Effort Belt (RIP)
2. Body Position
3. Airflow (thermistor)
4. Airflow (pressure based)
5. Snore (from cannula)
6. Heart Rate
7. Pulse Oximetry
8. Actigraphy (with Web Portal)

Featuring

Sensor Check

Lights to indicate proper sensor connection.

Smart Check

Validates quality of recorded sleep study before SleepView is returned to the lab. SleepView can perform multi-night studies.

ID CheckTM

Verify identity of patients during home sleep study.

Titration Study Option

Titration of Positive Airway Pressure in Patients with Obstructive Sleep Apnea studies

CLINICAL VALIDATION

EXCEEDING AASM GUIDELINES₄

✓ Airflow

Pressure transducer with Thermal biosensor

✓ Respiratory effort

Respiratory Inductive Plethysmography (RIP) Biosensor (uncalibrated)

✓ Blood oxygenation

Finger pulse oximetry with fast sampling rate and high resolution
Heart rate is derived from oximetry data

----- PLUS MORE -----

+ Snore

Derived from airflow

+ Event detection

Automatic respiratory event detection

+ Sleep time

Estimate of total sleep time

+ Body positions

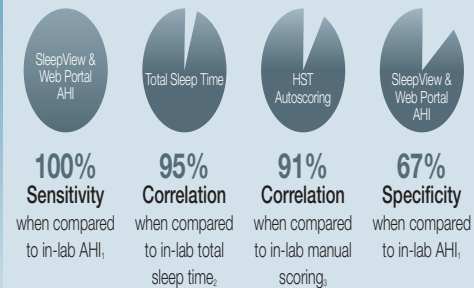

Supine, prone, left, right and upright

SCOPER₅ SCORES

	0	5	4	3	2	1
Sleep				3*		
Cardiovascular			4			
Oximetry						1
Position					2	
Effort					2	
Respiration						1

The highest SCOPER score is 1

CLINICAL STUDIES

CLINICAL CONCLUSIONS

- SleepView[®] **exceeds** American Academy of Sleep Medicine (AASM) guidelines for home sleep testing HST
- SleepView[®] **scores high** on SCOPER
- SleepView[®] offers high clinical benefit & **improves access** to patients
- Significant **cost efficiency** to payers
- **Continuum of care** from providers

TREATMENT

RESMED

The **global leader** in the development, manufacturing and marketing of innovative medical products for the treatment and management of respiratory disorders, with a focus on sleep-disordered breathing.

Wake up to Sleep™
ResMed's sleep apnea support community

Clinically superior devices that offer unparalleled comfort and quiet.

COMPLIANCE

Research indicates that if patients and their families have the proper equipment and training, an adequate number of caregivers, and a support system of experienced healthcare professionals, they will adapt to and continue therapy.

Most researchers agree that the best approach to improving compliance is a multi-faceted approach:

- Comfortable, easy-to-use and reliable equipment
- Education supplied by the healthcare team—a population-based CPAP program consisting of consistent follow-up, "troubleshooting," and regular feedback to both patients and physicians can achieve CPAP compliance rates of > 85% over six months⁶
- The patient's active involvement in his or her own treatment
- The support network available for the patient

ResMed masks combine lightweight comfort with superior seal and fit.

COMPLIANCE SUPPORT NETWORK

Wake Up to Sleep is ResMed's comprehensive sleep apnea support community intended to help people along their entire journey—from awareness to diagnosis to successful treatment.

Wake-Up to Sleep **24/7** Support T: 877.389.8868
