

Where can I obtain U.S. school curricula for children, so I know what topics are being covered at certain age levels?

Q: Where can I obtain U.S. school curricula for children, so I know what topics are being covered at certain age levels?

According to the U.S. Department of Education, they don't have a master list of the state-by-state curricula available. Information has to be obtained from each state's education department. To make that task a little easier, I did locate a site www.ccsso.org/seamenu.html that provides links to each state's department of education. 3:4/01
