in collaboration with

ASCENSION SAINT JOSEPH - CHICAGO

Unparalleled excellence in medical education -- ACLES

ACLES programs are medical educational experiences like no other! You'll find no other courses in foot and ankle surgery that compare with the high-level collegial experience ACLES meetings provide. You'll train and consult with the nation's leading educators and practitioners of lower extremity medicine and surgery in a relaxed, intimate environment that promotes engagement between presenters and attendees.

This program features regular opportunity for one-on-one learning in structured lecture sessions, discussions, and workshops. Course content addresses every aspect of lower extremity surgery, from diagnosis to post-operative care. The wide-ranging content enables experienced professionals to stay current with trends and developments in the field, and allows most physicians to acquire their annual requisite CME credits.

Program Objectives

After this session, attendees will be able to identify key strategies for improving patient care utilizing new techniques in surgery and wound care and appropriate treatments regarding vascular and diabetic disorders.

All efforts with reviewing presentation content to ensure that no bias toward any product is presented. This is reviewed prior to the conference and monitored during the presentations by William Sarchino DPM and Stephen Kravitz DPM, Conference moderators
