

International Payment olutions, LLC

FREE MONEY!!

International Payment Solutions has been lowering dentist's credit card processing costs for 20 years. Their average reduction for dentists is 27%. We recently saved a doctor in Minnesota using one of the biggest banks in America \$1700 a month on his processing. How much can we save you?

A doctor in New York took 15 minutes of his day to talk with Leo Townsend and is now putting \$1000 a month back in his pocket.

To give you an idea of your possible savings, take your total fees and divide it in to your total processing volume. For example, \$350 in monthly fees divided by \$10,000 in volume equals a 3.5% effective rate. Your supposed 1.49% means nothing if your effective rate is 3.5%! International Payment Solutions' experience shows that most dentists are paying 3-4%. Imagine if you paid 2% or less? If you're volume is \$20,000 a month, that's a possible \$200-300 a month back in your pocket. Higher volume? Higher savings!

You can put more of your hard earned money back in your pocket by simply taking 15 minutes to talk with Leo. Start by sending a recent processing statement by fax to 844-483-1996 or emailing to interpay@aol.com.

It's real simple...send us your processing statement, we'll do an analysis and show you how much money you can put back in your pocket. Don't let someone else take too much of your hard earned money. See how much your savings can be today! Contact Leo Townsend, President and Owner of International Payment Solutions at 844-483-1995 today!
