

SME CLINIC

COMPREHENSIVE ORTHOPAEDIC BRACING
Caring Hands in Your Rehabilitation

There are many choices for Orthopaedic Bracing. Here's why you should choose **SME CLINIC**

Tommy Foster, Jr. is a board-certified, Orthotist and Pedorthist. He attended The University of Tennessee at Chattanooga for his undergraduate studies, and The Medical College of Wisconsin in Milwaukee where he obtained his pedorthic training and certification. This was soon followed with his training and certification in orthotics.

His staff position with SME Clinic as Clinical Director, Orthotics, returned him to the Triangle area in 2013, having previously been on staff with Raleigh Orthopaedic Clinic, 2007-2010; where he served as Staff Practitioner (Orthotist/Pedorthist) and Supervisor of the Orthotic and Pedorthic Department.

Mr. Foster has 20 years of adult, adolescent and pediatric patient care experience which includes comprehensive upper and lower extremity orthotic clinical care in contracture management; cranial deformities; fractures; neuromuscular disease; sports injuries; spinal curvature (scoliosis); joint arthroplasty; and trauma. He has a particular focused interest in pediatrics and disorders of the foot and ankle.

In his clinical practice, Mr. Foster has a special interest in children with neuromuscular disorders such as cerebral palsy, spina bifida, and muscular dystrophy. Having a brother, Timmy (pictured to the right and on back cover with football), born with cerebral palsy, he truly understands the challenges facing families with special needs children.

In 2014, Mr. Foster co-founded The Raleigh Comprehensive Pediatric Neuromuscular Clinic. RCPNC is a monthly multi-specialty clinic devoted especially to children with neuromuscular disorders like cerebral palsy, down syndrome, muscular dystrophy, spina bifida and spinal muscular atrophy.

At SME Clinic, he provides pediatric orthotic clinical services for congenital and developmental problems; sports injuries; clubfeet; fractures; femoral anteversion; dislocated hips; juvenile rheumatoid arthritis; neuromuscular disorders; tibial torsion; torticollis; and spine conditions including scoliosis, spondylolysis, and spinal stress syndrome.

Additionally, Mr. Foster has special training in orthotic clinical management in adult and adolescent disorders of the foot and ankle, which include posterior tibial tendon dysfunction; post tibial neuritis; charcot arthropathy; and the neuropathic diabetic foot. He has received specialized training in the comprehensive management of the neuropathic foot at The National Hansen's Disease Program in Baton Rouge, LA; and musculoskeletal trauma through The University of Louisville Hospital in Louisville, KY.

He holds membership in The Association of Children's Prosthetic-Orthotic Clinics, The American Academy of Orthotists & Prosthetists; and is credentialed through The American Board for Certification in Orthotics, Prosthetics and Pedorthics (ABC); and The Board of Certification/Accreditation International (BOC).

Visit www.SMEClinicRaleigh.com to meet Tommy Foster, Jr. and take a tour of the clinic!
