## DYC Inter Club Competítíon 2007

## Report from John Waller, PYC Interclub Convener

This year five clubs entered a total of twenty three exhibits, but only four clubs had sufficient entries to be eligible for the Interclub Trophy. The participating clubs were: City of Sails Youth Stamp Club, Ashhurst Junior Stamp Club, Hutt Valley Junior Stamp Club, Christchurch Youth Stamp Club, and Dunedin Young Stamp Collectors Club. Of the twenty three exhibits there were five traditional and eighteen thematic exhibits.

This year there were fifteen frames of display material, with the competition taking up ten of these, four one frame display exhibits which were completed at this year's camp, and one frame of PYC promotional material. The whole lot looked quite magnificent on the day and I saw many of the good crowd of visitors looking at them. Congratulations to all the exhibitors on your fine efforts in making this years competition a great success.

The results were:
Best Thematic exhibit
Sophia Fairbrass Christchurch Youth Stamp Club

Best Traditional exhibit
Kieran Liddington City of Sails Youth Stamp Club

Winning Club City of Sails Youth Stamp Club

## From Barbara Streeter, City of Sails Club Co-Leader

We were thrilled as a club, to win the Interclub Trophy again this year. Our members have worked very hard during 2007 and the stamp camp held in Christchurch in July was the most beneficial, informative and inspirational aspect of their success. The club has had an influx of new members this year and three of these were able to attend camp, which helped them to understand the art of stamp collecting and displaying their pages at a quicker rate than otherwise would have been achieved. They are all looking forward to next years Interclub where they hope members of other clubs, who haven't yet done so, will be inspired to enter this annual nationwide competition.
It was great that the club had three members in Hamilton to receive the Trophy from Trevor Bevan, who was the judge for the competition this year. He passed comment on the great standard of entries now being entered, and the variety of topics being covered by young collectors.

## WHat's In Thie shioc box

For many years I have collected envelopes with interesting markings on them. They live in a shoe box, why there? It is the best place that I can think of for storing them. Envelopes are hard to store without
damaging them, without folding or creasing or bending. Many philatelic items are soaked off envelopes and then they have lost their Postal History story, which is in the markings and cancellations.

The 1978 cover on the right from Italy, is a prestamped envelope, it has also a baseball stamp and a pictorial postmark featuring baseball. To add to its interest, it is an airmail letter, therefore an Italian Air Mail label has been added, and an extra stamp to make up the airmail rate to New Zealand. Now I would really like that baseball stamp on the bottom left corner for my collection. Do I soak it off the envelope, NO NO NO. That would destroy the postal history and the thematic appeal of the cover.

The envelope on the right attracts you to the humorous drawings bottom right, but the main philatelic interest is that no stamp has been attached. The markings are from the base that this soldier was attached to, and would have been put on by the administration corp, in Egypt and passed by the censor whose mark is bottom left on the cover.

On the left is a cover which was sent to Australia, and has been returned to New Zealand, because the addressee had left the address.

The blue round one dollar Kiwi stamp is very hard to find on cover, and although the postal markings are quite heavy, it is still an interesting piece of postal history.

The 2005 cover on the right is quite unique with marking from Wanganui Mail Centre.

To see a postal delivery employee signature on an envelope is very unusual, and as can be seen by the dates, quite recent.

Editor thanks Geoff Tyson and John Waller for the use of philatelic material used in this article.

## QUESTION \& ANSWER

Q. If two stamps are joined together, should I keep them both in my collection?
A. This is something for you to decide. If you have two stamps, and one is dirty or torn or spoiled with a very heavy postmark, then take the better one for your album. But if you have two good stamps side by side with a nice clear postmark, why not put them into your album as they are?

CONERATULATIONS
The following young collectors have been awarded PYC Achievement Awards since our last listing.

Ben Marshall Arron Marshall Sharon McTaggart Anna McTaggart Peter Oomen Dawn Richardson Amy Rosenfeldt Emma Sturges Brydon Sundgren Charyne Sundgren

The local post office has run out of all stamps except for the 9 cent and the 13 cent stamps. However it is clear that many values can be made up using various numbers of the two stamps available. What is the largest value that cannot be made up from the two stamps?

There are many types of stamps you will come across when collecting, some are illustrated below.
Can you match the name and description to a stamp? Write the number of the stamp you think fits the description into the box. The answers will be given in the next newsletter.
