

# Noreen's Kitchen

**Real Food for  
Real People,  
Real Easy**

## All About Us

---

Noreen's Kitchen is a highly engaged interactive, online community where the focus is on, home cooking, home keeping and lifestyle tips. I want to encourage people to get back into the kitchen and take pride in preparing meals for their families. I strongly believe in our mantra; "Real Food for Real People, Real Easy."

The goal is to help people make their lives better and knit their families closer together over simple, home cooked meals as well as tips and tricks to make every day living just a little bit simpler.

## Our Mission

---

My mission is to get people back at the table with their families! Creating a home environment that brings them closer together. I want everyone to be as passionate about this as I am!

## Noreen Lambert

---

I am a wife and mom with a purpose and a passion for home making and cooking. I think these skills are just as important as math or science and I want to help everyone know how easy it is! I believe that a person cannot truly be independent if they cannot cook or create a home for themselves.

# Demographics

Our viewer/readership is comprised of a well balanced combination of women and men, leaning more toward the female demographic. Our age range is between 18 and 45

The average Noreen's Kitchen fan is someone who enjoys good food, good company and loves their family. They want to live a better life by providing delicious, nutritious meals for their household. They are concerned with their budget, where their food comes from and even learning how to grow and preserve their own garden harvest. They try hard to bring the best of the old ways into a modern way of life for themselves and their families.

It is always a distinct pleasure to work with sponsors and brands. I love helping them to reach my audience who trusts my opinion and my judgement. They know I will never steer them wrong. I feel it is important to help sponsors achieve the highest level of exposure for their product or their brand and I treat each one as if it were my own. I look forward to potentially working with you soon!
