

How do You Manage and Motivate Your Volunteers?

Volunteers are the lifeblood of most organizations. Whether the organization is a nonprofit or for-profit, motivated volunteers are vital to the success of the organization and its primary mission.

V-Tracker is an ideal complement to Blackbaud's suite of software solutions for nonprofits, healthcare organizations, educational institutions or any charitable giving entity. V-Tracker extends Blackbaud's product functionality in new ways by providing web-based tools for volunteer tracking, scheduling, self-scheduling, instant communication and detailed documentation of training, work history, skills and feedback.

V-Tracker optimizes the performance and processes of volunteer organizations by providing...

- **A multi-functional dashboard** that allows administrators to monitor fundraising events and volunteer activities in *real time by community, district or state*.
- **Four lightning-fast communications components** on the dashboard provide administrators and/or district supervisors with the tools to contact large or small groups of volunteers, donors or field staff with instant text messages or mass email.
- **A portal on subscriber's website** (accessed by volunteers, supervisors and managers) displays fundraising events populated in real time by volunteers, supervisors and field staff.
- **Online web page for each volunteer** not only documents work history, training, skills and feedback; web pages also have back-links to the user's scheduling application, allowing volunteers to update their own availability for any event or time period.

Not only does **V-Tracker** support a committed volunteer base; it provides tools for organizers to evaluate and qualify their most valued resource, *the volunteer...* insuring that the best and brightest are motivated, cultivated and engaged throughout the year.

More about V-Tracker

V-Tracker is a 100% web-based application.

No installation, no costly IT support or software maintenance.

Triple-redundant backup.

User data is safe, in the cloud or on the ground.

No Power? No Problem!

Use a laptop with a mobile "Hot Spot" to access V-Tracker to schedule volunteers, change an event time or to send text or email messages.

Roll-based logins

provide users with full or limited access to V-Tracker.

Volunteer interactive web pages provide a back link to the scheduling application

allowing volunteers to self-schedule (in real time) for any event.

Volunteer Profiles in V-Tracker

document each volunteer's contact information, ongoing availability, skills and interests.

Flexible filters, mouse overs and drop-down menus

allow staff to sort and qualify volunteers by availability, location, skills and interests.

Event organizers can schedule volunteers in fundraising events

or community projects with lightning speed on V-Tracker's Split Screen Scheduler.

Replacement Volunteers

scheduled with the same speed and accuracy as initial volunteers scheduled.

Scheduler instantly updates work history

for volunteers or field staff on their personal web pages; displays comments, jobs scheduled and a record of all electronic communication.

Sends hundreds of text messages or mass emails

instantly with a click of a mouse.

A portal on user's web site (for volunteers, supervisors and managers)

displays fundraising or educational events, populated in real time by available volunteers, supervisors or managers.

Custom Reports.

V-Tracker delivers five general reports archived in the application as PDFs. A custom report writer is available. Output: PDF Reports, Excel or .csv files.
