## LADDER SAFETY TRAINING IS REQUIRED BY OSHA!

OSHA 3124-12R 2003  
Page 16

### Training Requirements

Employers must train all employees to recognize hazards related to ladders and stairways, and instruct them to minimize these hazards. For example, employers must ensure that each employee is trained by a competent person in the following areas, as applicable:

- Nature of fall hazards in the work area;
- Correct procedures for erecting, maintaining and disassembling the fall protection systems to be used;
- Proper construction, use, placement and care in handling of all stairways and ladders; and
- Maximum intended load-carrying capacities of ladders used.

**Note:** Employers must retrain each employee as necessary to maintain their understanding and knowledge on the safe use and construction of ladders and stairs.
