

IS 2021 A LEAP YEAR?

END OF THE CHURCH AGE

Day/Year Calculations

by Luis B. Vega

The purpose of this study is to ascertain some calculations based on different Day/Year counts as it pertains to the possible year of when the Church Age is to conclude. As many who study the End Times and Typologies of the Bible, the closing-out of the yearly Summer Harvest Season is a High Watch Time for the Rapture event. Why Summer in particular? It is because the Church Age is generally associated with a 'Harvest', that of Souls; a 'Catch', that of Fish or Men, etc. It is an 'Intermission' between the Feasts of YHVH that prophetically correlate to the whole Plan of Redemption based on the 7 Feast types. This 'Pentecostal' Intermission is one in which the outreach and Plan of Salvation has been and is being extended to non-Jews, called the Gentiles.

As this Church Age is but an 'Intermission', it is to come to a close as it began as it is temporary but has been in play for nearly 2000 years. Since when? Most would attribute the timeline to when Jesus was 'born' in Year '0'. Of course, this is not correct. It is only an arbitrary designated year. This study will strongly suggest the time or the Church Age occurred in the year Jesus died for the Church and that for the Sins of the whole World. That year was 32 AD by some estimations. There are other studies specific to this thesis. Nonetheless, this 'Intermission' of the Church Age is a respite from the 'Main Event' that deals with the People of Israel. The Prophetic Storyline will pick-up once the Church Age is concluded with the Rapture event.

It is believed that this Church Age is to be 2 Prophetic Days as in 2000 years. This is attributed to the view of Dispensationalism in how in the Bible and even in the book of Enoch, there is a 7000-year Timeline of Human history to be had. In the book of Enoch, the delineation occurs in divisions of 10's or 7 period of 1000 years. In the Bible, there is the Age of Creation for 1000 years. The Age of Government for 1000 years after the Flood of Noah. Then there is Age of Law for 2000 years. This was and is specific to the calling of an Earthly People. In this case, it was, is and will be the 12 Tribes of Jacob that became Israel. But since Jesus Christ, He was rejected of national Israel.

Thus, this rejection gave way to the Intermission of the Church Age that has been the present circumstance, prophetically pertinent to the Plan of Salvation only found in Jesus Christ. This Age of Grace is thus 2000 years. The remaining 1000 years is for the Millennial Kingdom. And notice that such a 7000-year span of time or 'Ages' mirror that of the 7-Day Creation Week, the 7 Holy Feasts of YHVH and the Menorah. This is why, the 4th Branch of the Menorah, that of the Servant Stem corresponds to the 4th Letter, that of the 'Door' and of the Feast of Pentecost, etc. And this is predisposing that the end of the Church Age will be because of the Rapture event.

Convergence of Times

As those who attempt to calculate the 'Season' of the Rapture each year, there is always the issue of which Calendar to use or is in use. There is much confusion and angst over not being able to rightly divide the Times and Seasons. Or is it really. In Genesis, YHVH prescribed the 'Clock' to which such Times and Seasons would be pegged to, the Sun, Moon and the Stars. It should be rather simple, no? To such an end, many who study Eschatology, or the End Times have grappled with many types of calendars and have come up with many theories, timelines and conjectures. But what does the Bible say about such calendars and counts? In particular, in the books of Daniel and Revelation, there are some astonishing year and day counts.

The issue is what is the start dates? Aside from all that as background, presently, the question has been asked, is the year 2021 a Leap Year? The questions are being asked because, as usual, the various calculations and types of calendars used are not panning-out. But what if the year 2021 is a Leap Year? Then it throws all the calculations off for sure. But will 2021 be the Year of the Rapture? It remains to be seen as now the Summer is more than half over. But that time remaining is still to be considered and watched, regardless of what calendar one is attempting to decipher. And this is really the answer to such Rapture Day, year watches and calculations.

One realizes that the 2000-year Church Age is about to close. It is in its last years, if the 'start time' is from 32 AD. This timeline would put the start of the Tribulation Period in 2025. Or who is to say that this is actually signaling the start of the Great Tribulation. This is the delineation of the 2nd portion or half of the 7-year Sabbatical Cycle this study has called the 'Last Shemitah'. How is one coming to this conclusion or time estimate? If one adds 2000 years, straight-up to 32 AD, then that equals 2032. Then if one subtracts the 7-year Tribulation Period, that would be 2025. Thus, one can see that using this upper limit of the 2-day = 2000 year factor, then it is a matter now of only a few years for the Church Age to close.

But the question remains, is this 2021 a Leap Year? Sure looks that way as the year's Fall Feasts start before the Fall Equinox. So, it cannot be right Astronomically and thus presently with the Rabbinical Calendar has a need for a 13th Month that is to be added or should be. The same principle of prophetic 'calibration' needs to be applied for the Fall Feasts of YVHV as it was for the Spring Feasts. They are to be pegged to the Spring Equinox, as were the Spring Feasts or should have been. Thus, for the Fall, it is the 1st New Moon after the Fall Equinox. So, for 2021, October 6 is when the New Moon occurs and that should be Yom Teruah or Feast of Trumpets, for example.

It is not September 6, 2021, which is a whole month off. The question is, when is that 13th month to be added, if at all? The Rabbis usually add it at the end of the year count but not sure if they are officially recognizing the need or how that is factored in to look like or if it will even happen. But here are some more possible calculation to consider in light of that Reset coming and Digital Wallet Crypto Currency Plan since 1988. And this is based on that Economist Magazine cover that came out in 1988, being 33 years in 2021. Does it mean the Worldwide Economic Collapse will be initiated in Fall of 2021?

Calculations

Is the Rapture in 2021 then after all? Or both still? If the Body of Jesus is still on Earth after one's own calculated High Watch Days, then it just means that the Church has more time to do its work. But it may not be looking good for that 'Summer Basket of Fruit' and 'we are not saved' or Raptured in this case. But one believes that the true calculations of the Times and Season are to be pegged to the Solstices and Equinoxes. For 2021, there is September 20th as that is the Astronomical end of Summer to still consider and watch. So, one did come count comparisons just to get more 'confused'. Here are the assumptions. When will the Church Age end? To help determine this 'end', the year 1948 as the Prophetic Benchmark will be used. But what Day/Year calendar count to use in terms of Days/Years then? 360? 364? 365?

And this is also assuming an equal Prophetic Count Matrix of 1 Day = 1000 years. Ok. And then one is pegging the 2000 years of the Church Age or the '2 Days' to 32 AD, that one and others believe was the crucifixion year and start of Church Age. The other factor in the count is that the '7-Year Tribulation Period' is not 7 years of 365 days. This is known because the actual day count is given, that of 2520 days. This is then based on a 360 Day/Calendar count. What is tricky is that one knows for a fact that the Tribulation Period will be exactly 2520 days, aside from those days after for cleansing and rebuilding, +30 and +75, etc.

But when one uses the 360 Days/Year coefficient and then try to mesh that with the Western 365 Days/Year, it is going to be off by a bit. This is perhaps the key in trying to find a more accurate timeline. So, when will the Church Age end? This inquiry could then give an approximated range as the Resurrection/Rapture will be the last day of the Church Age, etc.

A) 365 Day/Year Calendar Count

If the 365 Days/Year count is used = 730,000 days

32 AD + 730,000 days (2000 years) = 3032

This 3032 matches with the Sacred Gematria of the Great Pyramid.

If one subtracts 2520 days = 2025

So, does this suggest when the Church Age is to finish then? Is this the upper limit if considering 1948? In such a case, it would be now beyond the reasonable count to be in the affirmative of a 'Generation' per Psalm 90.

B) 364 Day/Year Calendar Count

If the 364 Days/Year count is used = 728,000 days

32 AD (July 28) + 728,000 days (2000 years) = October 6, 2025

This would also coincide with the same year using 365 Days/Year. Again, it would take it past the 70-80-year Psalm 90 limit for a Generation, etc. But that is if one is using 1948. What if it is 1949 or another year perhaps?

C) 360 Day/Year Calendar Count

If the 360 Days/Year count is used = 720,000 days

32 AD (July 28) + 720,000 days (2000) = November 11, 2003

With this limit, one knows for sure, it is not the correct one as the Tribulation Period nor the Kingdom have started using this count from the year that has already come and gone.

So, what would be the more accurate Days/Year Calendar based on these simplistic Day/Year calculations? It should be the 364 one but one is not totally convinced of this. Why not? 2021 What about 2021 then? It seems a particular year. However, a lot of years for example since 9-11 have been and have come and gone. For sure, there probably was and is some prophetic significance to them. But what is also rather interesting is that Rothschild's Economics 1988 edition of the Phoenix Rising Crypto is messaging 1988, 2018 and 2025. It is well understood that the family name, that of the Rothschilds, which means 'Red Shield' was that of a Red Hexagram.

This shield was above their home that served as a lending 'Bank' in the German city of Frankfurt during the Middle Ages. It is believed that they are part of the 13 Bloodlines of the Illuminati according to the research of Fritz Springmeier. It is they that financed all the wars, corporate monopolies, Israel, drug and sex trades, banks, etc. So, it is not a stretch of the imagination to suggest how they use Predictive Programming to broadcast their plans, hidden in plain sight. Some believe such magazine covers of their very own Economist, that they own does that.

And it is not stretch of the imagination that the coming Mark of the Beast will involve some sort of Digital Currency infused in the 'Wallet' of the body of a person, biologically fused with such technologies. Thus, the need to have everyone on the planet injected with this sort of mRNA and DNA type of technology. The COVID-19 Virus and those that are designed to be released subsequently will be and are the pretext for having bought-off Government Official mandate the injections. For the Beast System to work, every human on the planet has to be connected to the Internet of Things.

Here are some subsequent calculations to this effect. If one sets the year to when the edition came out in 1988 and then one adds a Sabbatical Cycle, that year they insinuated, then a particular year emerges that keep reoccurred in the Church Age timeline calculations, 2025.

1988 + 7 years = 2025

So, this 2025 does keep reoccurring. And if one adds 1 Sabbatical Cycle after Israel's Birth 1948 + 7 years = 1955. This is to say that if perhaps 1955 is the start date of sorts, then + 70 years = 2025. But this is a 365 Days/Year count. If one uses the 364 Day/Year count, it would still be within the year 2025 when using 70 years x 364 Day/Year = 25,480.

May 1955 + 70 years (25,480 days) = February 2025

The 70-year count using 364 Days/Year from 1948 was still in 2018. Why? The year 2018 was Israel's 70th Year Anniversary. This is of course if one believes the modern State of Israel is that which was foretold was to be regathered as in Ezekiel's account, regardless of the Rothschild's means. But this just gets back to the year the Economists signaled that perhaps, a 7-year countdown commenced for their New World Order to begin in 2025 in some way. Or if one adds 33 years to 1988, it equals 2021.

2018 + 7 years (1 Sabbath Cycle) = 2025

1988 + 33 Masonic Years = 2021

Did the 1988 Rothschild's Economist edition announce that 2018 was a countdown then or in 2021 perhaps? Are all such signaling mere 'stepping stones' in their Luciferian Plan to take over all the world and connect every human to their Digital Currency that will eventually led to the Mark of the Beast? Yes.
