FILING TIPS

- *Are you aware you can populate information to a renewal affidavit form?*

The [InsCipher Help Section](#) reminds users to first search and use existing insured information before adding a new insured. This will help reduce duplicate entries.

- *To back out a misfiled or duplicate transaction, file a flat cancel submission.*

Be sure to reverse the premium details, use the current date as the broker received date and upload either the original policy document or Report of Electronic Submission.
