

Moguloid Sealants

- A pure, colloidal liquid makes a solid metal bond!
- Penetrates deep into fissures - builds up interlocking layers!
- Withstands same heat and pressure as repaired metal!
- Fast, easy to use ... will not plug up the system!
- Anyone can make repairs.

for Heating Systems

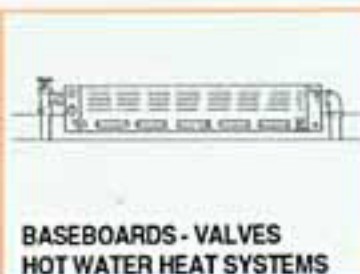

Hot Water or Steam - Hot Water Heaters

Now, its possible to make lasting repairs to minor leaks in heating systems with out tools, mechanical knowledge or time consuming and expensive part replacements. Simply pour in **Moguloid Heating System Seal** according to

instructions on the can and you have repaired hot water heating systems, steam heating systems, hot water heaters, radiators, valves, etc. Leaks are sealed with a metallic bond that becomes an integral part of the repaired metal.

Available in 32 oz. containers.
12 containers to shipping carton.

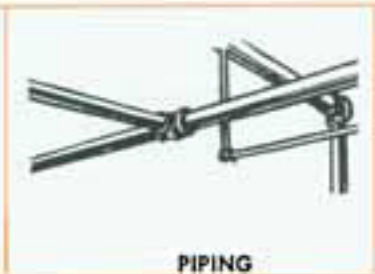

BASEBOARDS - VALVES

STEAM BOILERS

HOT WATER HEATERS

PIPING

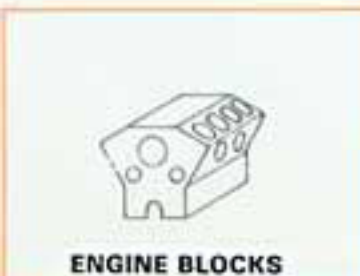

for Auto Repair

Any one can make a lasting seal in automotive cooling and heating systems by simply pouring into the radiator according to directions. **Moguloid Block Seal** will seal seepage blocks, radiators, heads, pump housings and heaters **without** harmfully coating the inside of

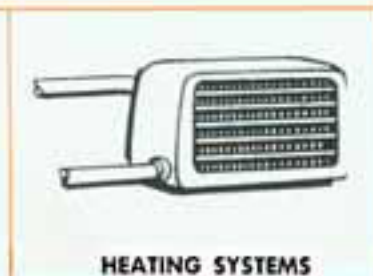

the cooling system or cylinder walls. Unlike vegetable poultice sealants, it will **not** deteriorate ... will **not** cause overheating. Completely free from harmful gas forming ingredients, its metallic colloidal action penetrates deep into fissures and invisible pinhole leaks.

Available in 16 oz. containers.
12 containers to shipping carton.
