

ProTVSolutions
HTV Emulator-Universal
Digital to Analog Device (D2A)

In most cases, TVs have either a headphone jack or analog stereo output jack. If not, this is a device that allows the HTV Emulator-Universal to work TVs that only have digital audio outputs.

If your TV does not have a headphone jack or an Analog Stereo output jack, then you must use a D2A. We can provide D2As that have been modified to provide the correct audio signal level. Cost is only \$15.00 each.
