

The Safe School Framework

Increasing Safety Compliance with Local and National Guidelines

Increasing Safety Management Capabilities (Tight Integration between Technology & Process)

Safety on School Buses

Temperature Checking & Hand Sanitization

- Temperature check on entry to school bus
- Facial recognition of students if needed
- Exception alerting
- Hand sanitization

Safety at School Entrances

Temperature Checking & Hand Sanitization

- Temperature check at school entrances
- Facial recognition of students if needed
- Exception alerting
- Student count for attendance recording
- Hand sanitization & messaging

Safety in School Buildings

Health Awareness Messaging

- Digital signage to promote health awareness
- Dynamic content management and scheduling to send the right messages at the right time
- Thermal imaging and tracking to monitor and manage social distancing
- Realtime management of people capacity on the school premises and in school venues
- Monitoring of entrances and exits

Social Distancing

Realtime Analytics

- Realtime exception reporting
- OOTB Analytics and dashboards
- Tailored reporting for key stakeholders
- Integration with local and national processes and procedures for exception handling

Realtime Analytics and Alerting

Integrated Health Procedures

- School complies with local and national re-opening guideline
- Students actively monitored for social distancing
- Proactive health awareness messaging and hand sanitization
- Proactive temperature checking and exception handling

Full training and adoption services / Total Managed Services as needed
