

THE VERNAL HEXAGRAM

THE CONVERGENCE OF PROPHETIC TIMES AND SEASONS RELATED TO THE END OF THE AGE

The Equinox total solar eclipse of March 20, 2015. It is the only solar eclipse that is total in the solar series of the 2014-15 Blood Moon Tetrad and falls precisely on the Spring Equinox and Jewish religious New Year. In YHVH's calendar, it is marking an 'end' or a 'beginning' of a moment in time that could have prophetic significance of Biblical proportions. The particular phenomenon that will be highlighted in this study is the planetary hexagram alignment that occurs on this precise date. In the Heavens, the unique planetary hexagram is viewed from the top of the Solar System. The hexagram planetary configuration will be illustrated in conjunction to the depiction from the perspective of the rising of the Sun in Chichen Itza. Why there is a strong connection to this time and place is that at no other place and time does a 'Serpent of Light' appear on the steps of a pyramid due to the astronomical alignments of Earth on the Equinox time of year. The Spring Equinox eclipse could be an announcement or the sign of the coming Biblical AntiChrist 'Prince' on one level and a dress 'rehearsal' of the Rapture on the other. There is a duality on another level also occurring, astronomically. How the Rapture and the AntiChrist are insinuated by the Equinox eclipse is that this tandem event is seen on Earth at a particular time and place, Chechen Itza. This event is a rendering of the equilibrium of the light and darkness, a balance between 'good' and 'evil', as above, so below, etc., or an exchange. Astronomically the Equinox total solar eclipse occurs in Pisces, adjacent to Pegasus and Andromeda. More precisely the Equinox total solar eclipse occurs in-between Aquarius and Pisces; conjoining the position of the planets on the Ecliptic.

As noted, what is peculiar about this Equinox eclipse is that all the planetary alignments configures a celestial hexagram 'Star of David' or of *Rem'pha*. This in turn construes a double tetrahedron that to many, denotes a Stargate or door of sorts. In sorcery and Freemasonry for example, a hex is an evil spell cast upon others. It is also used to configure a place where an inter-dimensional door is used to cross over. To the sorcerers or Wizards, the hexagram is a powerful tool to invoke the presence of Lucifer and demonic spirits, in essence it becomes a portal, a 'Stargate' of sorts in this case astronomically that could see a translation of sorts. One translation for Itza is 'Wizard of the Water' or Enchantment with connotations of the Leviathan. The Maya are prophetically anticipating the return or translation of Kukulcan, or Venus/'Phoenix'. He was the symbol of the Sun-Pleiades-Zenith conjunction. Astronomically, at the center of this hexagram on the Equinox is the planet Mercury, the god of money and medicine.

TOP VIEW OF SOLAR SYSTEM MARCH 20, 2015

CHICHEN ITZA

THE STARGATE OF THE SERPENT
How Chechen Itza is related to the Equinox eclipse in particular is that from the Pyramid and the steps of the Serpent of Light to the maximum point of the eclipse to the east of Iceland is at a heading of 33 degrees and at a map length of 66 degree. The 66 degree angle is one of the heading of the whole pyramid complex construct of Chechen Itza. It also corresponds to the ley line and the time of maximum of the eclipse as it occurs below the horizon.

THE DESCENT OF THE PHOENIX

To the occult, Luciferians, Masons, New Agers, etc., Mercury is a depiction of the 'Shining One' - Lucifer that promised to return and appear to help humanity in the New Age at the End of Days. It will be through money and medicine that the AntiChrist, the Phoenix to come will control his New World Order. Astronomically, Mercury is serving as the fulcrum being the key in its celestial position. 2015 or 2016 as 5776 is considered the Year of Light. At the time of the Equinox, the 'Shining' Serpent of Light is configured on the steps of the Chechen Itza pyramid by the setting Sun as the Pleiades have reached their maximum during midday.

THE ASTRONOMICAL RAPTURE

Will it not the Rapture be as a 'snatching' away of the Bible that is described as a flight? It will be a type of Pegasus with the mounted Pisces whisking away Andromeda, the Chained Woman. It is an amazing depiction of the persecuted Bride of Christ related to the Church Age of time as 'fish' that have been caught all throughout the Church Age for the past nearly 2000 years.

This study is not insinuating that at this time is when the Rapture or the unveiling of the AntiChrist is to occur but that it astronomically depiction is striking and perhaps it is a prelude as this Equinox total solar eclipse is the last to mark the end of time for the Church Age.

The Phoenix is known by many names to many cultures; as Nimrod, Osiris, Orion, etc. Each culture has had their own names given but all of them refer and converge on being Lucifer. To the Maya, they are prophetically anticipating the return of this the Phoenix so much so they have etched this rehearsal onto their pyramid and is commemorated every Equinox.

It is speculated that what will be the 'Initiation' of the AntiChrist will be accompanied by celestial omens and signs. Such astronomical signs are key to know the times that are at hand as it could herald Jesus Christ's forthcoming return soon thereafter. In essence the Last Days will see the 'Return of the Prophets'.

CELESTIAL OMENS

What is extremely rare about the solar eclipse occurring on the March 20, 2015 is that out of 4 solar eclipses corresponding to the Tetrad, only the one at the time of the Equinox occurs at the time of the Jewish religious New Year. The Equinox eclipse will be 178 days to Rosh HaShana, 188 days to Yom Kippur and 6 months and 6 days (69) to the Super Blood Moon and last of the Tetrad on the Feast of Tabernacles.

By definition, every year on March 20-21 the Vernal Equinox happens, meaning 'spring's equal night.' It is when the Sun is above the horizon for 12 hours everywhere on Earth. The Equinox is the half-way point (0.0°) The northern limit is at the Tropic of Capricorn (23.5°) north and the southern limit is at the Tropic of Cancer (-23.5°) south.

A NEW WORLD ORDER

The Equinox solar eclipse depicts a mirror of the horizon at the time of the Sunrise. It will be at the Sunset that the Serpent of Light copies its Sunrise at precisely a 45 degree angle of Mercury descending down the Ecliptic. The depiction suggests that the Son of Perdition is to be revealed soon. This notion thus suggests that the coming Rapture is to occur first but be in tandem with the unveiling of the AntiChrist. It is one of the few places on Earth where there is a direct connection with Biblical prophecy of the Last Days. The March 20, 2015 Total Solar Eclipse in particular seems to accent and highlight the sequence and could signal a very
