Philosophy

Health and Physical Recreation are extremely important in the development of a child and adolescence. Physical education allows students to express themselves in a variety of different activities. Teamwork, problem solving, determination and perseverance are all skills that students can acquire by participating in a Physical education program. Physical Education is an extremely important subject and I look forward to working with your students to make their Health/Physical education experience the best.

Testimony

I was fortunate to be raised in a Christian home and with a loving church family. I have seen God work many miracles in my life and the lives of my family and friends. When the world says no way God always says I can. God is on our side and still in the business of performing miracles.
