Rule Proposals

2nd Time Submitted:

1. M.R.A CLASSIFICATION CRITERIA

M.R.A. ropers will be rated from a #1 to a #7 based on their ability level using the following classification criteria. The following are the general classification definitions for each team roper ability level.

#1 TRUE BEGGINNER- Inexperienced riders with little roping experience. Uncomfortable roping from a horse, this roper has difficulty controlling their horse and rope at the same time. This roper is new to competition.

#2- This roper is competing more and catch percentages have increased. Comfortable roping from a horse, but limited horsemanship skills prevents control over any aspect of the run. This instability prevents making necessary adjustments during the course of a run, which leads to inconsistency from one run to the next.

#3- Better rope handling mechanics allow for more catches. Better horsemanship skills afford control on slow moving steers but this roper still lacks the necessary rope skills and horsemanship to adjust to fast moving steers. Headers do not handle cattle very well and heelers lack ability to time feet. Both are inconsistent at putting runs together for the average.

#4 HEADER- Catches more than misses and handles cattle with more consistency. This roper rides a conservative barrier so most of his/her catches are well down the arena. This roper stands out in the lower class roping, however would struggle to rope faster cattle.

(HEELER) This roper can sense being in time with the steer, which allows for a better catch to miss ratio. Reaction time is slow making it difficult to adjust to speed in the run. He/She has developed a pattern from one run to the next but struggles to catch many steers in succession. This roper stands out in the lower class roping, however would struggle in the higher divisions.

#5 HEADER- Catches the majority of steers around the horns. Getting Better at riding the barrier, this roper is turning steers on a more consistent basis. Handling steers through the corner is becoming easier, allows heelers a more frequent shot behind them. Typically rides to the hip of the steer taking several throws and therefore does not take time out of the run.

(HEELER) This roper is starting to find timing with the steer and catching on a more consistent basis. Timing is more automatic, so this roper will seldom completely miss a steer, however, he/she will frequently rope one leg. Focused more on catching than dictating the speed of the run. Better reaction time to the run is allowing the roper to adjust quickly and make moves to rope the steer.

#6 HEADER- Catches the majority of steers around the horns. Better at riding the barrier, this roper is turning steers where the heart of the roping is taking place. Skilled at handling steers through the corner, allows heelers to catch more easily and more frequently behind them. Typically rides to the hip of the steer before taking a throw and therefore does not take time out of the run.

(HEELER) This roper knows when they are in time with the steer. Better horsemanship and better rope handling skills allow them to make adjustments during the course of the run-in order to time up with the steer. This roper rides a conservative corner and usually tracks the steer several jumps to find a throw. Timing is more automatic, so this roper will seldom completely miss a steer. Focused more on catching than dictating the speed of the run.

#7 HEADER This roper can dictate the speed of the run. Skilled at riding the barrier, he/she will catch most steers in the upper 1/3 of the arena. This group consists mostly of the better headers in the amateur ranks of rodeo.

(HEELER) Sound horsemanship and sound rope skills allow this roper to catch most of their cattle by two feet. This roper sets the run up using a wide angle relative to the steer and rides aggressively through the corner. A solid catcher with intermittent ability to speed up the run. Typically, this roper will hold slack overhead, thus allowing more rope to extend between them and the steer. The inability to quickly shut the run down on a consistent basis prevents a higher classification. Competitive jackpot heeler.

"ELITE" roper- A classification system is used to limit the margin of error in setting roping divisions. Each roper is classified or rated with a number 1 through 7, according to his or her ability to rope. No roper will be numbered higher than 7. Your classification number is your ability rating as judged by the board of directors. In order to finetune this classification system, the M.R.A. has implemented the "Elite" system. By definition an Elite roper is someone who has proven by performance to have a competitive advantage (or disadvantage) among his or her classification group but is not a full classification number off. Headers classified as a #2 through #7 will be eligible to receive an Elite classification. For example, a #5 header who has proven to have a competitive advantage will be reclassified as an Elite #5 (5.5). Moreover, a #5 header who has proven to struggle, but would be too dominant as a #4, would be reclassified as an Elite #4 (4.5). Therefore, ropers can move up to an Elite status or down to an Elite status. The classification categories for all M.R.A members will be as follows: #1, #2, Elite #2 (2.5) #3, Elite #3 (3.5) #4, Elite #4 (4.5), #5, Elite #5 (5.5), #6, Elite #6 (6.5), #7, Elite #7 (7.5). Therefore, ropers can move up to an Elite status or down to an Elite status. The effect of the Elite system will further level the playing field by preventing two Elite ropers from partnering together unless they give up a division. For example, an Elite #5 header won't be allowed to enter the #10 division with an Elite #5 heeler. Instead, they will have to enter the #11 division. However, an Elite #5 header will be allowed to enter the #10 division with a #5 heeler. In other words, the sum of your classification and your partner's classification determines the division you are eligible to enter unless BOTH ropers are classified as "Elite". This procedure will more closely define the caliber of each roping division.

2. If a potential member buys their card on Labor Day Weekend, it will be good for that weekend and the whole following fiscal year.
