

# Did you Know?

---

For Medicare Patients with two or more chronic conditions, a little extra attention can go a long way. Do you lose track of which medications

to take and when? Do you have trouble making appointments with a specialist? Or do you just need someone to answer your questions?

---

By signing up for **Chronic Care Management services (CCM)**, you get the extra attention you need – attention that could mean the difference between a weekend at home with your family or hours spent in the emergency room.

## ◆ CCM MEANS ◆

- Having staff help you coordinate your care with different specialists
- Making sure you have the right prescriptions.
- Getting a monthly check-in to keep you healthier.

Patients with multiple chronic conditions are more likely to be hospitalized and have restrictions on their ability to work and engage in daily tasks.

With Chronic Care Management, your doctor devotes extra attention to your needs, helping you stay healthier without extra office visits.

That means better management of your healthcare needs, avoiding hospitalization, and spending more time with your family and friends.
