Her main role was to establish an enterprise-wide centralized patient scheduling department, assist in the development of scheduling software, and supervise the scheduling staff.

During her tenure there she served in various roles, including enterprise scheduling consultant, product specialist, senior account manager and senior account specialist. Working with customers across the country provided Mila with the opportunity to develop ongoing client relationships and educate customers on the use and benefits of the software products. In her position with McKesson, Mila worked with third party vendors and many business units within the company.

While working full time for McKesson, Mila pursued her educational career. She completed her Bachelor of Science in Health Arts and Masters of Science in Health Services Administration from the University of St. Francis, Joliet, IL.
