TACILE
OF DISTINCTION**

BY

HOYT

FOREWARD

As each year goes by our experience becomes greater and this fact is reflected—in the form of improvements and greater refinements—in the equipment we produce or stock. We are searching and experimenting constantly to bring about better quality for our customer's greater shooting pleasure. A service for which there is no charge. We feel that listed in the pages of this catalog are concrete examples of this increased quality covering a full price range of equipment in each category — bows, arrows, accessories, raw materials, etc. A finer grouping of superb equipment cannot be found anywhere. And - - - it's reasonably priced.

TERMS

All prices are f.o.b. St. Louis, Mo. Please include sufficient postage. All goods are sold subject to approval and are returnable within 5 days after receipt, providing goods has not been marred or broken. Prices and specifications are subject to change without notice.

ORDERING

When ordering bow be sure to specify bow weight, length of draw, whether right or left handed and any other pertinent information. When ordering arrows state length (measured from bottom of nock to taper of pile on target arrows and from bottom of nock to base of blade on broadhead arrows) and weight of bow.

The

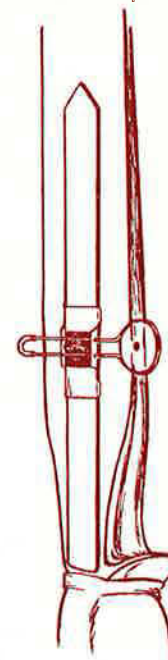

LINE-O-SITE

"Moves the Target from Behind the Bow"

The LINE-O-SITE is unique in design and simplicity and incorporates all the features most desired in a bow sight: light weight, easy but positive friction adjustment, no rattle, easily attached, fits snugly to back of any bow, available in plain lens, prism lens or post type sights.

The most revolutionary feature of the LINE-O-SITE is the use of a one, two or three degree prism mounted in such a manner as to project the target image horizontally, thereby compensating for lack of perpendicularity between sight and arrow due to width of bow limb, or to compensate for an anchor position which is not vertically beneath the aiming eye. These conditions are manifest when the regular sight is set as close as possible to the side of the bow and the resulting shot hits to the right of the mark, in the case of a right hander, or vice versa for the left hander. The use of the specially mounted prism (a one degree prism usually is sufficient) corrects this condition and therein lies the derivative of the name LINE-O-SITE. When no problem of alignment is experienced, the plain lens or post type sight should be used according to preference. Four, eight and twelve degree prisms are also available for vertical projection when needed for the longer ranges.

The LINE-O-SITE was used by top ranking archers in winning titles in the National, Midwestern and many state and club tournaments. Proving beyond doubt the true merits of this effectively designed bow sight.

DEFLECTION TABLE FOR PRISM SELECTION

PRISM	DEFLECTION	PRISM	DEFLECTION
1°	16" at 40 yds.	4°	12' at 100 yds.
2°	27" at 40 yds.	8°	21' at 100 yds.
3°	39" at 40 yds.	12°	33' at 100 yds.

NOTE: 1, 2, 3 degree lenses are mounted to project the target image horizontally, 4, 8, 12 degree lenses vertically.

LS-1	LINE-O-SIGHT, Complete Kit	\$3.50
	Includes: One Prism (any degree), one Plain lens and one Post Sight.	
LS-2	LINE-O-SIGHT, Prism Lens only (any degree)	2.50
LS-3	LINE-O-SIGHT, Plain Lens only	2.00
LS-4	LINE-O-SIGHT, Post Sight only	1.25

PROFESSIONALS

THREE HOYT CHAMPIONS —THE CHOICE OF THE EXPERTS

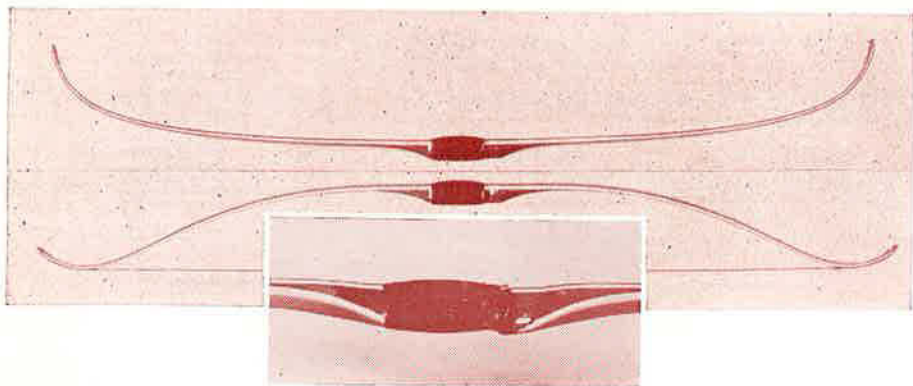

The most superb line of composite bows yet developed — the results of over three years of intensive research, experimentation and know how. HOYT PROFESSIONALS have become the popular choice of the experts in whose hands many championships, records and events were won or established in club, state, regional and national tournaments. The records speak for themselves — a tribute to PROFESSIONALS in achieving the ultimate in bow design and performance.

HOYT PROFESSIONALS are the fastest bows built today — pound for pound, length for length their performance is without equal. The scientific combining of super strength materials plus precision machining has resulted in a bow characterized by smooth, even draw — no "stack up" — soft crisp action, constancy of cast under varying climatic conditions and rugged durability. Supplementing this is their beautiful flowing lines that blend in pleasing transition, from shapely handle to trim bow tips.

SPECIFICATIONS: Toxhorn plastic facing, multi-ply fiberglass backing and hardwood laminated core. Pistol grip handle contoured to fit the hand. Built-in-arrow rest designed for smooth arrow passage and greater accuracy. PLY-O-STRING bow string. Beautiful plastic finish. Each PROFESSIONAL has a registered serial number stamped beneath the handle. Name, date and full specifications are recorded in our files. Specify draw length, draw weight and whether right or left handed. Choice of leather or plastic grip.

GUARANTEE: Each PROFESSIONAL is guaranteed for one year from date of purchase against faulty workmanship and materials. Unless bow shows evidence of misuse, free replacement will be made should failure occur during the first sixty days after purchase. Thereafter, replacement will be made on an exchange basis wherein the customer pays 10% of the purchase price for each month of service received from the bow.

WORKING RECURVE MODEL

HANDLE DESIGN

The ultimate in bow design and performance. Unsurpassed for smooth draw, speed of cast and soft action. Lengths 63", 66" and 69". Weights to 70 pounds.

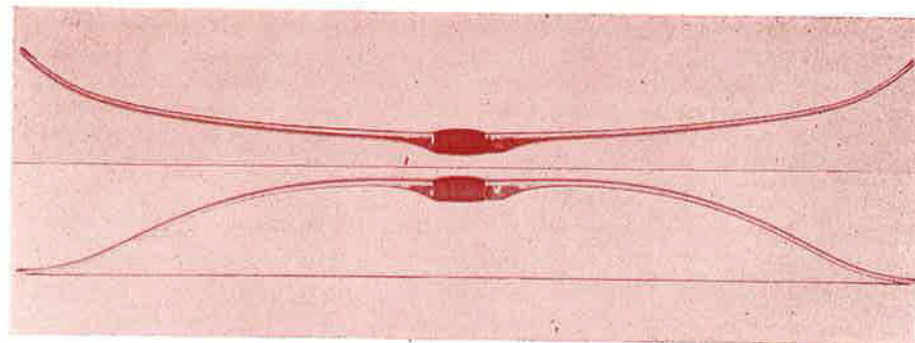

BC-200WR—PROFESSIONAL \$48.00

NOTE: For special, patented take down handle fitted to PROFESSIONAL bows \$10.00

ABEL RUBBER BRUSH NOCKS for hunting, demountable \$1.00 pair

The LINE-O-SITE bowsight and our DRAW CHECK were designed especially for the PROFESSIONALS. See listings under ACCESSORIES.

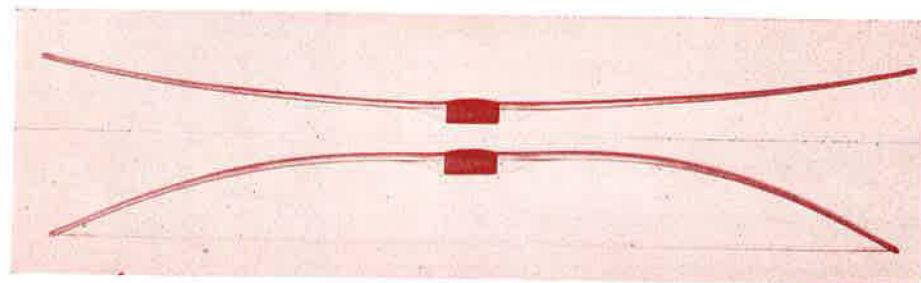

MODIFIED STRAIGHT LIMB MODEL

An improved design effecting better action and smoother draw than straight limbed bow but retaining full stability. Also available with built-in Non-Snag tips. Lengths 63", 66" and 69". Weights to 70 pounds.

BC -200ML—PROFESSIONAL \$39.50
BCF-200ML—PROFESSIONAL, Non-Snag tips 43.00

STRAIGHT LIMB MODEL

A fine utility bow similar to the PROFESSIONAL line of bows but with a more conventional handle design. Limbs reflexed. Lengths 60", 63", 66" and 69". Weights to 70 pounds.

BC-200SL—SEMI-PROFESSIONAL \$28.50

LEMONWOOD BOWS For Schools, Colleges, Camps and Clubs

Built of choice Lemonwood in the efficient flat design, bows of this group have graceful lines, deep narrow leather handle, two toned handle riser, reinforced string and flexible varnish finish. State draw length and bow weight.

BLS-66 —5'6", 15-40 lbs., for arrows 26" to 28" \$ 8.50

BLS-66B—5'6", Fiber backed, 18-45 lbs. 11.00

BLS-63 —5'3", 15-30 lbs., for arrows 23" to 25" 8.00

BLS-63B—5'3", Fiber backed, 15-35 lbs. 10.50

BL -66 —5'6", 20-32 lbs., for arrows 26" to 27" 6.50

BL -63 —5'3", 17-30 lbs., for arrows 23" to 25" 6.00

BL -60 —5'0", 15-25 lbs., for arrows 23" and less 5.00

BL -54 —4'6", 12-20 lbs., for arrows 20" and less 4.00

Bows

APOLLO TUBULAR STEEL BOWS (Guaranteed for One Year)

The finest line of metal bows yet to be engineered, made by England's leading manufacturer of tubular sporting equipment.

We have departed from precedence in offering our customers, for the first time, a bow of custom quality other than one of our own manufacture. However, we feel the merits of this bow warrant our placing it at the disposal of our customers. We have carefully studied the whole field of metal bow development and with considered judgement have chosen the APOLLO as a fitting supplementary line of bows to our PROFESSIONALS.

APOLLO bows are smooth and comfortable to shoot and have extremely flat trajectory.

APOLLO bows are unaffected by the weather.

APOLLO bows have been used by champion archers of the United States, England and Australia.

APOLLO bows are available in four great models.

SWALLOW

A new light APOLLO bow made specially for the American market at a keen price for those using short arrows. Based on the elliptical design, is 54" long and gives a draw weight of 21 lbs. at 22" and 24 lbs. at 24" draw. Has the same graceful lines as the more expensive models and is fast and sweet shooting. Weight in the hand is less than 12 ozs. Its point-of-aim is below the target at ranges up to 70 yds. and it is eminently suitable for all womens rounds.

Price \$25.00

APOLLO BOWS ARE EASY TO TAKE
APART—HAVE COMFORTABLE CORK GRIPS

KESTREL

A 60" bow made in 2 draw weight groups: 32-38 lbs. at 26" draw and 36-42 lbs. at 28" draw. The former is modeled on the 36 lb. Merlin and has all its advantages. The latter has an amazingly flat trajectory, is well below the target at 100 yds. and is eminently suitable for field archery. A fast bow, suitable for men, with a draw-length of 27" or 28".

Price \$37.50

YEW AND OSAGE ORANGE BOWS

Available on special order. Prices range from \$40.00 to \$60.00. Only choice materials and glass backing are used.

MERLIN

A 58" bow made in draw-weight groups 18-24 lbs. at 24" and 22-36 lbs. at a 26" draw. The 30 lb. bow will give the average archer a point-of-aim below the target at 80 yds. and the 36 lb. gives the average man a point-of-aim below the target at 100 yds. Light in the hand, fast
Price \$37.50

ANN WEBER
(USEING MERLIN)

FALCON

A 66" bow available in draw weights from 35-43 lbs. at 26" draw and 39-47 lbs. at 28" draw. Unparalleled as a target bow being steady and sweet shooting. Bows 40 lb. and over have a point-of-aim below the target at 100 yds. and the 45 lb. model is ideal for the 180 yds. clout.

Price \$37.50

Construction Kits

COMP-BO-KIT

Completely tillered - ready to shoot - requires only shaping the handle (cut to outline if desired) and adjusting the limbs for final balance. Precision made of glass, plastics and wood. Nothing more to buy. Saves up to \$25.00 on the cost of a new bow. Money back guarantee against faulty materials or workmanship. Your choice of two superb models corresponding in design and quality to our BC-200ML and BC-200SL PROFESSIONALS.

BCK-200ML—Modified Limb, 63", 66" and 69", weights to 70 pounds.....\$22.50
BCK-200SL—Straight Limb, 60", 63", 66" and 69", weights to 70 pounds..... 17.50

LEMONWOOD BOW KIT

Precision processed by the same methods used in the construction of our PROFESSIONAL bow line and the COMP-BO-KITS. Select lemonwood, machined and contoured for correct tiller of limbs. Handles roughed out. Furnished with plastic handle material and linen for string. CKB-2—60", 66", 69". Weights to 50 lbs.....\$4.75
For fiber backing applied, add..... 2.00

ARROW KITS

Includes 12 tapered cedar shafts milled for points and nocks, 12 plastic nocks, 12 steel points, 12 sets ground base feathers and 1 tube fletching and nock cement. State arrow length.
CKA-1—Target Kit, 9/32" or 5/16" sizes.....\$2.75
CKA-2—Blunt Roving Kit, 11/32" and 3/8"..... 2.95
CKA-3—Broadhead Kit, 11/32" and 3/8"..... 6.25

Mystik DURA-SERV and Mystik PRO-CAM

We have developed two highly specialized uses for this fine pressure sensitive tape. One as a superb serving material for bow strings, the other as a protective covering and camouflage for hunting bows. Both usages have been tried and proven in their respective fields and found far, far superior to any other materials yet tried.

We are so enthusiastic about Mystik DURA-SERV as a trouble free serving that will add considerable life to the bow string, that we predict this serving will be universally adopted for this specific purpose. Mystik DURA-SERV is so easily and quickly applied that those using it accept it with acclaim.

Mystik PRO-CAM provides a protective, waterproof bow covering of olive drab that creates an effective camouflage. Easily applied and easily removed without injury to finely finished surfaces. Mystik PRO-CAM is a MUST with the big game hunter.

Mystik DURA-SERV and Mystik PRO-CAM are packaged by us with complete instructions for application. For prices see listings under BOW MATERIALS and ACCESSORIES. Dealers write for quantity prices.

TARGET ARROWS

Arrow Sets
Are Attractively
Boxed.

SUPER-X METAL ARROWS

SUPER-X metal arrows are made of Easton 24SRT-X aluminum shafting, the finest obtainable. SUPER-X arrows have won many championships and set many records during the past two years. Precisely matched in weight, spine and balancing point. Available in a combination of 16 diameters and wall thicknesses, making possible correct matching to bows of all weights. Precision fletched with our special SPIR-O-FLETCHED 3 1/2" vanes. Hardened steel points. Highly polished shafts. Choice of Mid-Nox, Speed Nock or Sure Nock. Numbered. Crested and fletched to your specifications if desired.

TA-100—SUPER-X, METAL ARROW.....Dozen \$24.00

Four feather 2 1/2" SPIR-O-FLETCHING \$1.00 per dozen extra

CHAMPION AND EXPERT CEDAR ARROWS

CHAMPIONS are the elite of the wooden arrow line. Precision made of highly select Port Orford Cedar. Tolerances are: 5 grains weight, .03" spine, 3/16" balancing point. Sizes 5/16" and 9/32", tapered shafts spined to fit your bow. 3 1/2" SPIRO-FLETCHING. Numbered. Choice of Mid-Nox, Speed Nock or Sure Nock. Crested to your order.

TC-100—CHAMPION, Port Orford Cedar Arrow.....Dozen \$12.00

TC-102—EXPERT, similar to CHAMPION except stock crested and matched to .05" spine only.....Dozen 7.50

Four feather 2 1/2" SPIR-O-FLETCHING \$1.00 per dozen extra.

White or dyed fletching \$1.00 per dozen extra.

ARROWS FOR SCHOOLS, COLLEGES AND CAMPS

Sturdy, well-made arrows of Port Orford Cedar. Extremely accurate and SPIR-O-FLETCHED. Steel piles and Speed Nock, stock crested. Sizes 5/16" and 9/32", tapered shafts.

TC-106—SCHOLAR, 22" to 28" in inch graduations.....Dozen \$5.00

TC-108—TYRO, 18", 21", 24", 26" and 28".....Dozen 3.75

FIELD AND HUNTING ARROWS

Unless Specified
Field Arrows
Are Equipped
With Oversize
Points For
Greater Strength

SUPER-X METAL FIELD ARROWS

Similar in all respects to the SUPER-X target arrows but SPIR-O-FLETCHED with 5" low cut vanes. Fitted with Speed Nock or Sure Nock and choice of target pile, field or roving point, or Diamond broadhead. Full crested as desired. Numbered.

FA-100 —SUPER-X, Field Arrow (target, field or roving point).....Dozen \$25.00

FA-100B—SUPER-X, Broadhead Arrow (Diamond Blade, 2 or 4 edge).....Dozen 30.00

Four feather 3 1/2" SPIR-O-FLETCHING \$1.00 per dozen extra.

White or dyed white fletching \$1.00 per dozen extra.

RANGER AND SCOUTER FIELD ARROWS

The RANGER line is the ultimate in field arrow design. Highest quality Port Orford cedar shafts, tapered. Sizes 5/16", 11/32" and 3/8", matched to 10 grains weight and .05" spine. 5" SPIR-O-FLETCHING insures accurate, non-planing flight, even should broadheads become misaligned in service. Shafts may be had in clear, white, orange, yellow or olive drab finish. Numbered and brightly crested as desired. Fitted with Speed Nock or Sure Nock and choice of broadhead, blunt, field, roving or target points as listed under Arrow Material. Specify type of head.

FC-100 —RANGER, Field Arrow (target, blunt or field point - add 50c for roving point).....Dozen \$9.75

FC-100B—RANGER, Broadhead Arrow (add cost of broadhead selected) Base price Dozen 9.00

FC-102 —SCOUTER, Field Arrow (similar to RANGER except stock crested and matched .05" spine only).....Dozen 7.25

FC-102B—SCOUTER, Broadhead Arrow. Same specifications as FC-102 (add cost of broadhead) Base price.....Dozen 6.50

Four feather 3 1/2" SPIR-O-FLETCHING \$1.00 per dozen extra.

White or dyed white fletching \$1.00 per dozen extra.

Color dipped shafts, \$.50 per dozen extra; no charge when crest is omitted.

ROVER AND ROVETEER FIELD ARROWS

For truly low cost, expendable cedar arrows of great accuracy for use in practice, roving or hunting, better values have never been offered. SPIR-O-FLETCHED and fitted with Speed Nock and choice of blunt, target or broadhead point. Neatly crested. Sizes 5/16", 11/32" and 3/8". Specify type of point.

FC-106 —ROVER, Field Arrow (target or blunt point) 3 1/2" vanes.....Dozen \$5.50

FC-106B—ROVER, Broadhead Arrow (add cost of broadhead selected) 5" vanes. Base price.....Dozen 5.75

FC-108 —ROVETEER, Field Arrow (similar to ROVER except not crested).....Dozen 4.50

FC-108B—ROVETEER, Broadhead Arrow (same as FC-108) (add cost of broadhead selected) Base price.....Dozen 4.75

FISH ARROWS

Available in either 5/16" aluminum shaft or 3/8" cedar shaft, 30" long. Choice of Zwickey flexible barbed fish point or barbed broadhead point. Either plain or fletched. Fletching is unnecessary when line is used.

FC-110 —Cedar Fish Arrow.....	Each	\$1.10

\$6.00 PER DOZEN

SPIR-O-FLETCHING

What is it? What are its merits? Technically these questions should be answered at length, employing a bit of descriptive geometry and the theory of aerodynamics. But briefly, we may say this: SPIR-O-FLETCHING stands for true spiral fletching and is not to be confused with diagonal fletching, erroneously referred to as spiral fletching. The merits of SPIR-O-FLETCHING are these: arrows absolutely cannot "plane" in flight due to warp or broadhead misalignment; smaller and lower cropped feathers for the same guiding effect as other types of fletching; lower cropping means less fraying of feathers; uniform rotation of all arrows in flight; does not create greater "drag" than straight fletching.

RYE STRAW TARGETS

Hand made of full length rye straw. Tightly stitched with tarred sisal. Six inches thick. Will outlast any other target.

MID-NOX, 3/16", 7/32", 1/4", 9/32", 5/16". Assorted colors . Doz. .60 Per 100 4.00

SURE NOCK, a new ingenious nock so designed as to prevent a nocked arrow from becoming disengaged from the string before shooting - a bow cannot be shot empty with this nock. Also, slender neck eliminates arrow pinch and flat sides of nock (parallel to string) make it the fastest nocking of all nocks. Wide bottom of string slot increases string life. Standard tapered hole. Sizes: 7/32", 1/4", 9/32", 5/16". Colors red, white when available. Doz. \$.60, Per 100 \$4.00

TURKEY FEATHERS

SELECT—FULL LENGTH—GROUND BASE Per Doz. Per 100
