and oriented towards Division St. Corbelled brick chimneys are located in the center of the hipped roof and at the end of one of the cross gables. Gable ends are trimmed with verge boards and overhang cut-away bays on the northern and southern facades. Overhangs have bracket and pendant detailing. Walls are covered with asbestos shigles but patterned siding is evident beneath the gables. The shed-roofed porch features a gabled entranceway milled frieze panels and balustrades, milled corner brackets, and detailing in the gable and under the eaves. The front entrance contains a double, glazed and paneled door, each with 10 lites. Two marble fireplaces on first and two on second floors. Original copper 43. (Cont'd.) bathtub removed.

of the house was probably built in the 1860's and rented to tenant farmers. In 1885 a large new barn was added, and in 1887 accounts of E.K. Huntington state that Andrew Cameron was building a large addition to his house, indicating that he had moved his family to this property, keeping the house on Cameron's Point for his summer home as oral tradition suggests. Records show that the builder was John Koehler who also built an addition to the Otto Dodge home (ERI-1735). In 1890 Andrew's son, John, married, bringing his wife to his family home. He continued to carry on the thriving farm and vineyards, inheriting the house and land in 1907. He was a much respected member of the community, and served on the Board of Directors of the K.I. Dock and Steamboat Co.
