INCIDENT COMMAND CHECKLIST

RESPONSIBILITIES:

Assume responsibility for the entire Mass Casualty Incident.

DUTY CHECKLIST:

[   ]   Assure MCI Card activation with KITTCOM

[   ]   Identify previous Incident Commander and facilitate transfer of command if needed.

[   ]   Don Identification vest

[   ]   Identify the incident command post and establish unified command if needed.

[   ]   Assess situation and determine needs, refer to MCI Card for resource activation.

[   ]   Attempt accessibility of location and its services when appropriate.

[   ]   Identify Staging, and if appropriate, Staging Area Manager.

[   ]   Contact and work in close communication to Medical Group Supervisor.

[   ]   Request additional equipment and/or manpower as necessary

[   ]   Identify a PIO and Safety Officer – personnel permitting.

[   ]   Maintain scene security

[   ]   Direct outside support agencies as needed:

    [   ]   **Hospital Control 509-899-4151 (Alternate 509-933-8739)**
    [   ]   Law Enforcement
    [   ]   Medical Examiner
    [   ]   Public Utilities
    [   ]   Red Cross

MCI- RESOURCE NOTES:

MEDICAL GROUP SUPERVISOR CHECKLIST

RESPONSIBILITES:

Direct and supervise the overall medical operations.

DUTY CHECKLIST:

[   ]   Report to and work in close communication to the Incident Commander,
        with priority to directly oversee the medical operations.

[   ]   Obtain needed equipment (vest, clipboard, checklists, triage kits, etc.).

[   ]   Don Identification vest

[   ]   Assess medical situation and needs, report to COMMAND.

[   ]   Assure that all appropriate medical positions are filled:
        [   ]   Triage
        [   ]   Treatment
        [   ]   Transport

        [   ]   Establish communication with **Hospital Control 509-899-4151 (Alternate
        509-933-8739**), request to activate protocol for MCI. Give **Hospital Control** size-up
        of situation with estimated number of casualties and categories of injured (#red,
        #yellow, #green).

[   ]   Establish funnel point from triage to treatment. Number patients on forehead and re-
        triage if needed as patients pass through.

[   ]   Consult with Treatment Leader on location of treatment area.

[   ]   Consult with Transport Leader regarding location of transport area and
        establishment of communication with **Hospital Control**.

[   ]   Establish an equipment pool adjacent to the treatment area for incoming medical
        equipment. Coordinate with Staging Manager if assigned.

[   ]   Establish a manpower pool for Litter Bearers. Assure proper equipment, lifting teams,
        and techniques. Notify Triage and Treatment Leaders.

MCI- RESOURCE NOTES:

TRIAGE LEADER CHECKLIST

RESPONSIBILITIES:

Direct and coordinate the evaluation, prioritizing, and tagging of casualties. TRIAGE will coordinate litter bearers to facilitate patient movements.

DUTY CHECKLIST:

[   ]   Don Identification vest

[   ]   Obtain needed equipment (MCI Cards w/checklists and tracking forms, triage belt, clipboard, vest).

[   ]   Identify triage member(s) and implement triage process.

[   ]   Estimate number of casualties (categorize R, Y, G and report to Medical Group).

[   ]   Consult with Medical Group Supervisor on location of funnel point.

[   ]   Facilitate numbering of casualties at funnel point.

[   ]   Acquire medical supplies for transporting patients to treatment area.

[   ]   Identify and brief the Litter Bearers on job assignments.

[   ]   Coordinate with Treatment Leader to assure that patients are being delivered to the correct treatment area.

[   ]   Request resources for Disability and Accessible Functional Needs when needed.

[   ]   Maintain safety and security of the triage area.

[   ]   Keep Medial Group Supervisor informed of your status.

[   ]   Report to Medical Group Supervisor for reassignment when triage is completed.

MCI- RESOURCE NOTES:

TREATMENT LEADER CHECKLIST

RESPONSIBILITIES:

Direct and coordinate treatment of patients in treatment area.

DUTY CHECKLIST:

[   ]   Don Identification vest

[   ]   Obtain needed supplies (MCI card w/tracking charts, triage tags, medical supplies, Blankets, etc.)

[   ]   Obtain estimated of the number of casualties

[   ]   Consult with Medical Group Supervisor to determine locations of treatment area.

[   ]   Set up treatment area into 3 sections; red, yellow, and green

[   ]   Using the treatment tracking form, record all patients entering the treatment area.

[   ]   Assure that all patients in treatment area are properly numbered (# on head and with numbered triage tag).

[   ]   Assign incoming EMS personnel to specific treatment section and assure that each treatment section is always manned.

[   ]   Assure that appropriate medical care is being delivered and patients are kept warm.

[   ]   Request resources for Disability and Accessible Functional Needs when needed.

[   ]   Request medical supplies or personnel needs through Medical Group Supervisor.

[   ]   Record patients on Treatment Tracking Form.

[   ]   Identify, as needed, medical leaders in each treatment section that are not allowed to leave.

[   ]   Coordinate with Transportation Leader, as soon as possible, to initiate Transport Plan. **DO NOT** wait for all patients to enter Treatment area before initiating transport to appropriate medical facility.

MCI- RESOURCE NOTES:

TRANSPORTATION LEADER CHECKLIST

RESPONSIBILITIES:

Coordinate with **Hospital Control 509-899-4151 (Alternate 509-933-8739)** and record the transportation of all patients to medical facilities. Transport will maintain radio communication with the Medical Group Supervisor to provide updates on patient distribution to receiving hospitals. **Hospital Control** will contact receiving hospitals for bed availability and recommend a Transport plan.

DUTY CHECKLIST:

[   ]   Don Identification vest.

[   ]   Obtain needed equipment (MCI Cards w/Transportation Tracking Chart, clipboard, vest, etc).

[   ]   Obtain estimated number of casualties and categories (#red, #yellow, #green)

[   ]   Identify a safe, efficient loading area (transportation corridor) adjacent to the treatment area. Secure access and egress routes and inform staging (coordinate with Staging Manager if assigned).

[   ]   Determine that an appropriate number of transport vehicles have been called to the incident.

[   ]   Additional equipment is requested through MED GROUP.

[   ]   Using the Transportation Tracking Form consult with Treatment Leader to determine when and what patients are ready for transport.

[   ]   Identify and brief Litter Bearers as necessary.

[   ]   Initiate communications with **Hospital Control-House Supervisor** for patient distribution. Text picture of Tracking Form when possible and provide updates as needed. Request receipt confirmation from HC. Communications should be maintained as needed for expeditious patient transfer.

[   ]   Be sure to document all patient destinations and transporting agencies on form. Text copy to **Hospital Control** once all patients are transported for accountability.

[   ]   Maintain security and safety in patient loading area.

[   ]   Collect ambulance supplies and equipment as needed for patient care during transport.

MCI- RESOURCE NOTES:

STAGING AREA MANAGER CHECKLIST
(If not under Operations)

RESPONSIBILITIES:

Establish a staging area for incoming emergency vehicles and personnel; directing emergency response vehicles to the staging area; stock piling equipment; informing the IC, OPS Chief or Medical Group Supervisor of the EMS certification levels of arriving personnel. Coordinate with the Transportation Leader the movement of arriving units and resources that will be transporting patients and directing the ambulance to the loading zone. Deployment of resources will be assigned by the Incident Commander or designee.

DUTY CHECKLIST:

[   ]   Don Identification vest

[   ]   Obtain needed supplies (MCI Cards w/Staging Tracking Chart, clipboard, etc).

[   ]   Obtain estimated number of casualties

[   ]   Consult with Transportation Leader to coordinate Transportation
        Corridor/Loading area.

[   ]   Designate staging location and ingress route, collaborating with the IC or
        Medical Group Supervisor (MGS).

[   ]   Log each arriving unit # and type of personnel on Staging Tracking Chart, provide
        information on quantity and types of units to the IC or MGS.

[   ]   Assign units to tasks as directed by the IC or MGS.

[   ]   Assure the arriving units have proper credentials for designated capability.

[   ]   Ensure a driver stays with each unit (preferably not EMS provider).

[   ]   Make radio contact with incoming units, manage ingress and ensure all
        transport units have immediate egress.

[   ]   Prevent freelancing.

STAGING AREA TRACKING FORM

Unit Number	In Time	Out Time	Assignment (rescue, treatment, etc.)	Comments: (service level)

Mass Casualty -- MCI HD#2-A (blue)

RESPONSE AREA: KC Hospital District #2 - West of I90 MP74 (West Nelson Siding) to MP53 (East Snoqualmie Summit), & all adjacent areas North & South

RESOURCE GOALS: As soon as initial number of patients is confirmed; resource notification is based on this number. MCI activation may be requested for fewer patients. Once minimum goals are met, additional resources need to be requested. Entrapment will be assumed at all MCI's unless directed otherwise. *Resources are in addition to initial dispatch.*
