

Online Ordering for Imaging Services Just Got Easier.

FREE to use
EASY to use
Electronic Order Entry
Web-Based
Only **ONE** training class

CaroMont Imaging Services announces a new online order process, Order Facilitator, which offers exceptional convenience for physician office staff who schedule radiology procedures.

With Order Facilitator, CaroMont Imaging is providing better patient care by eliminating lost or illegible orders while improving office efficiencies and productivity!

Order Facilitator will provide:

- Medical necessity verification for Medicare patients prior to sending the order.
- Customized order sets for quicker processing of commonly ordered procedures.
- Streamlined patient selection process with a patient database specific to your office.
- A real-time tracking system to identify when the order was received by scheduling, as well as, when, where and the time the exam was scheduled.
- Electronic physician signature.

The real time tracking system is my favorite feature, and the short-cut feature is wonderful!!!

-Kelly, Neuroscience & Spine Center of the Carolinas, L.L.P

The short cut order feature and the diagnosis favorites works great! All of my staff like it. The medicare medical necessity checking alert they receive before they can send the order saves everyone up front. They know right then a new diagnosis code is needed for medicare to cover the procedure.

-Michelle, Gaston Urological Associates

Send orders to:
Gaston Memorial Hospital
CIS-Summit
CIS-Belmont
Diagnostic Center
Women's Imaging Center

If you have questions or need more information, contact:
Michelle Crews, Scheduling Supervisor, 704-671-5434, crewsm@gmh.org.
