

# PowerStep™

## AMP Research Power Step Deployable Running Boards

AMP Research Power Step is a full length deployable automatic running boards that are triggered by the vehicles existing door latching system on your truck or SUV. The board is constructed of high grade aircraft aluminum and has a textured non skip surface specifically designed to prevent any mishaps when entering or exiting the vehicle. AMP Research Power Step utilizes weatherproof motors from the top industry manufactures. Its durable construction handles just about anything the steps will encounter.

**Each Kit Includes; (2) Two complete Running Boards with Motors, (4) Linkages Arms, OEM Wiring Harness, Control Module, LED Light Kit and all Mounting Hardware. (Optional Stainless Steel Trim is available)**
