PLEASE NOTE THAT A VARIETY OF CONNECTIONS ARE AVAILABLE FOR MOST SIZES (SEE CHART AT LEFT), THEREFORE, BE CAREFUL TO DETERMINE VALVE SIZE ACTUALLY IN USE, AS WELL AS PIPE SIZE.

AS CAN BE SEEN FROM THE CHART, A 3/4" VALVE MAY BE USED ON A 1-1/4" PIPE, ETC. POSSIBLY, THE BEST WAY TO CHECK VALVE SIZE IS TO CHECK FLANGE TYPE, I.E., OVAL OR SQUARE.

WHEN A VALVE/STRAINER COMBINATION IS USED, IT IS USEFUL TO MEASURE THE DISTANCE FROM THE CENTERLINE OF VALVE TO THE CENTERLINE OF STRAINER: THIS IS THE BEST WAY TO DETERMINE VALVE SIZE ACTUALLY BEING USED.
