Title: 2017 Changes to Excavation Law SB 661-Methods to comply when drilling/excavating

Abstract – Revisions to SB 661, Hill. Protection of subsurface installations was signed by the Governor on September 29, 2016 and went into effect November 1, 2017. This bill would require an excavator planning to conduct an excavation to delineate the area to be excavated before notifying the appropriate regional notification center of the planned excavation, as provided. The bill would require an operator, before the legal start date and time of the excavation, to locate and field mark, within the area delineated for excavation, its subsurface installations. Existing law requires an operator of a subsurface installation that has failed to comply with these provisions to be liable to the excavator for damages, costs, and expenses. Any operator or excavator who knowingly and willfully violates any of the provisions of this article is subject to a civil penalty in an amount not to exceed fifty thousand dollars (\$50,000).

Bio- Hector Manuel Dominguez is President and CEO of EXARO Technologies Corporation, Burlingame, CA. Born in Mexico and migrated to the USA where he grew up and received his Bachelor of Science degree in Electrical Engineering from SFSU, then obtained his professional engineering license from the California State License Board. After graduation he went to work for PG&E where he contributed in a variety of challenging construction and engineering projects with roles including failure analysis, standards and guidelines, superintendent and managerial roles. In 2005 he identified a bigger challenge, an opportunity to open a business with his brother and current business partner Jose Dominguez and continues focused on this challenge. Mr. Dominguez is the Responsible Managing Officer with a Class A General Engineering, C10 Electrical Contractor, C31 Traffic Control, licenses. Hector currently resides in Millbrae, CA; he enjoys the outdoors, travel, swimming and golf.
