

DTHLG-KIT Large Hitch kit Instructions

Bracket identification

- 0) universal brackets same as left and right
- 1) right side fixed deck bracket
- 2) left side fixed that bracket

Thank you for your support, please feel free to contact us at www.dttach.com with any questions or concerns.

Note

When referencing left and right sides of the machine, we always refer to the operators left and right while you would be operating the machine.

The 2 carriage bolts pictured through brackets number zero are just hand tight. If brackets number zero are selected in your application, you must fully tighten the Nyloc hex nut upon completion of the installation.

The telescopic travel on the large hitch mounting bar, spans from 31–44 inches
