### **SWJC Statement June 2020**

In light of current and past tragedies and inequalities present in our society, Southwest Jewish Congress stands with those who are in pain and those who are willing to make constructive changes.

The relevant parts of the Mission of SWJC, which the Board of Directors will continue to follow, are:

- to provide quality educational programs and events that support the United States Constitution and human rights, and
- to honor those who have significantly contributed to the advancement of our society, culture and lives.

SWJC programs and events will continue to stress engagement of multiple points of view. It is our hope that we can continue to inspire individuals to act positively and compassionately.

As individual Board members, we will continue to work with groups that seek to improve governmental and civic systems and educate their official representatives. We will continue to reject ideas that project hatred of race, religion, ethnicity or gender and/or diminishment of others different from ourselves in our society.
