WE PROUDLY SUPPORT

LIVE TO PROTECT

WELCOME TO SENTRY PRODUCTS GROUP. WE LIVE TO PROTECT!

On the following pages you will find our 2018 line-up featuring new products, innovative technologies and our expansion into new categories. Along with product line extensions we are proud to introduce our newest acquisition Hexmag, offering lightweight magazines and on gun accessories. The Hexmag addition, along with distribution channel growth has created new jobs in the USA and allowed us to further expand our production and distribution facility located in Boise, Idaho.

Whether you protect your home, family, or country, our commitment to you is simple—we will continue to produce the best, most innovative products on the market to enhance your experience. We are so confident that we back each product with a hassle-free Lifetime Warranty, protecting your investment.

From the team at SENTRY, thank you for your support and confidence.

WHEN EVERY ROUND COUNTS™

POLYHEX₂™

The proprietary advanced composite that all Hexmag magazines are made from delivers superior strength and reliable performance across the modern sporting rifle and pistol spectrum.

HEXTURE™

The element that binds the Hexmag line together is the signature, patented, design pattern. This design goes beyond great style it also provides a natural gripping surface.

STAINLESS-STEEL

All Hexmag magazines use the best heat-treated, stainless-steel springs to resist corrosion and fatigue while being loaded for extended periods of time.

HEXID COLOR SYSTEM

Is an integrated colored ammunition identification system pioneered by Hexmag. Revolutionizing the magazine market with its identifiable follower and latch plate colors. Shooters can personalize their magazines while separating different calibers and ammunition types.

TOOL-LESS

The industry's first true tool-less design for easy baseplate removal to allow cleaning and HexID color customization.

-----------------	--------------	----------------------

HEXID COLOR IDENTIFICATION SYSTEM

Born out of the necessity to identify your magazines that feed different calibers or different ammo types. Hexmag pioneered the colored rifle ammunition identification system – the HexID Color Identification System. Having the peace of mind that your investment, health, and safety are all accounted for using our color-coding system that can be changed without tools, and in under 1 min, has changed the industry.

TOP FIREARM MANUFACTURERS **PARTNER** WITH SENTRY

SENTRY prides itself on providing accessories directly to firearm and optic manufacturers through its OEM program. This OEM program provides efficient ordering, exceptional customer service and timely shipping, making sure inventory is packaged for ease of use by your assembly staff. With our OEM magazine program firearm manufacturers may configure a choice of multiple body colors assembled with any of our current HexID colors (followers and latch plates) of your choice, as well as round capacities for states that may have capacity restrictions. OEM magazines come in bulk packs without packaging and are intended to be included with the firearm only – not for retail sale. Additional items available for OEM use are SENTRY optic and Firearm Covers. More information about SENTRY OEM options can be found on pages 42 and 43.

TO LEARN MORE ABOUT OUR OEM PROGRAMS CALL 877-726-7328 OR EMAIL INFO@SENTRYLTP.COM

ALL SENTRY PRODUCTS COME WITH AN UNCONDITIONAL LIFETIME WARRANTY.

WORLD CLASS PROTECTION

NEOPRENE

Neoprene a material commonly used in wetsuits, conforms to the shape upon which it is placed. Our Neoprene/Nylon laminate composition assists in repelling moisture and condensation away from your optic, as well as, dirt and debris. This combination helps to protect your optics from the elements and damage while storing or transporting your gear.

STANDARD (3MM) SCOPECOAT®

Full coverage on standard or low turrets, this slim fit cover is perfect for the field.

XP-6 (6MM) SCOPECOAT®

Full coverage on tall or tactical turrets, XP-6 covers are constructed with 6mm thickness and elongated sides for maximum protection.

PULL TABS

New for 2018 all Standard and XP-6 model Scopecoats® will ship with durable 1/2" wide pull tabs.

SENTRY SCOPECOAT® SELECTING THE CORRECT SIZE

Scopecoat® protective covers fit a variety of optics. When using the right size to cover your optic measure the overall length and the outside diameter of the scopes objective. Our covers stretch approximately 10% beyond their stated size. This will allow you to better fit a cover to your optic while providing maximum protection.

TO DETERMINE WHAT SIZE SCOPECOAT® YOU WILL NEED PLEASE FOLLOW THE STEPS TO THE RIGHT.

MEASURING YOUR OPTIC

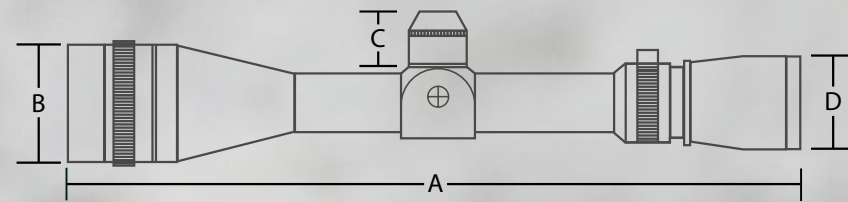

Optic sizes are listed by overall length and objective sizes. The length is measure in inches and the objective is measured in millimeters.

Measure the overall length of the scope, including the size of the sunshade, if applicable.

Measure the outside diameter of the objective in millimeters. The objective end of the scope is the end that you see out of, or end furthest from your eye.

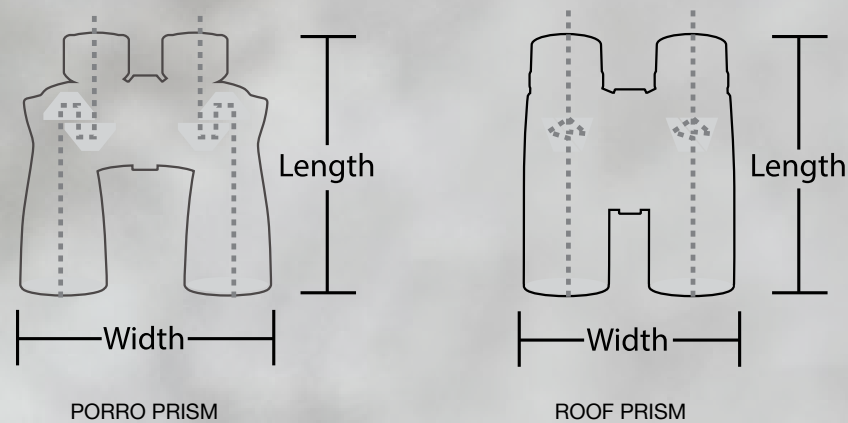

Measure the turrets (adjustment knobs). We consider turrets 0.75" or more to be "tall turrets" for these models we suggest the XP-6 for complete coverage.

Standard Scopecoat® protective covers are designed to fit scopes with standard turret heights and the XP-6 covers are designed for tall turrets and added protection.

MEASURING YOUR BINOCULARS

1. Determine if your Binoculars are Porro Prism or Roof Prism design.
2. Measure the Length (Distance from the ocular eye piece to the objective).
3. Measure the Width (Distance across the body of the binoculars).

[Color Code]

[Color Code]

SENTRY XP-6 6MM NEOPRENE SCOPECOAT®

The XP-6™ Flak Jacket is designed to offer maximum protection for all service-weapon optics. Elongated sides allow complete coverage for tall or tactical turrets.

CLEANING AND LUBRICATION

Sentry Solutions understand that your guns and gear are very important to you. Performance is paramount. Reliability is crucial. If your hi-tech gear jams, disaster may strike. If high value collectables are damaged in storage, your investments diminish. Protection is key.

THE PROBLEM

We looked at the major causes of failure:

- 1) Dirt, dust, and carbon cause fouling during operation of weapon systems.
- 2) The potential for pitting and corrosion while in storage, especially in areas of high humidity or near saltwater these problems multiply.

To combat these, we have been locked into an endless cycle of cleaning and lubricating with oil based products. However, as soon as oils are applied the cycle begins again, since it is the oils that attracts and holds the contaminants.

THE SOLUTION

Our goal was simple – end the cycle of cleaning and protecting with oils by developing a superior way to clean, lubricate, and protect your guns and gear. After years of extensive research, we created a dry lubrication system, that cleans and protects. In fact, Sentry Solutions oil-free gun care practically makes firearms self-cleaning!

HOW IT WORKS

By simply replacing solvents, patches, and wet, tacky oils with our dry, oil-free, CDLPs and lubricants that bond to the surface; Guns and gear operate better. Our products provide a micro bonding shield making metals non-stick, leaving nothing to attract and hold debris. Performance, reliability, and accuracy are enhanced; cleaning becomes as simple as brushing off and re-lubing. Sentry Solutions products will not thicken in the cold or thin out in extreme heat, providing protection in even the harshest environment. You will find that even after thousands of rounds, guns look like they haven't been fired and residue is just blown away.

SENTRY TUF-GLIDE™ CDLP AND TUF-CLOTH™

Tuf-Glide™ CDLP is ideal for quick maintenance at home or in the field. The special all in one formula allows for a quick clean, lubrication, and corrosion protection. Available in convenient cloth or bottle applications.

- Dry lubricant does not attract dirt, dust, and debris
- Great for all conditions, metals, and finishes, safe for wood and plastics
- Slick action in any temperature – won't thicken from cold or thin out from heat
- Keeps guns and gear clean, operating smoother, and lasting longer
- Prevents fingerprints, tarnishing, and dulling
- Micro-bonding shield inhibits rust
- Displaces moisture
