Sage 50 Quantum Manufacturing Edition

A Powerful Solution that's Specifically Designed for Small to Mid-Sized Manufacturers

From planning to assembly to delivery, manufacturing is a complex industry with many moving parts. Even small manufacturers must expertly manage inventory, fulfillment, and customer expectations in order to be successful and profitable.

Sage 50 Quantum Manufacturing Edition combines the accounting strength of Sage 50 Quantum Accounting with the best-in-class manufacturing system, MISys® from Manufacturing Information Systems, Inc.[1] With Sage 50 Quantum Manufacturing Edition, manufacturers are able to control inventory, schedule purchasing and production activities, and accurately tie manufacturing costs to finished goods and work in process. **In other words, with Sage 50 Quantum Manufacturing Edition, you can stop wondering about profitability and start managing it!**

Manufacturing Issues Resolved!

No matter what you are manufacturing, Sage 50 simplifies the process by resolving some of your most bothersome issues. For example, when you can easily track, monitor and control inventory, you no longer miss delivery dates because of material shortages. And, you don't need to spend hours manually counting and adjusting inventory.

In addition, Sage 50 lets you track material cost fluctuations and easily allocate labor costs to job orders for a true picture of profitability.

Sage 50 Quantum Manufacturing Edition also helps you solve some of these common issues:

- Not enough detail in Bill of Materials
- Can't track serial and/or lot numbers through a production run
- Can't track inventory and materials in multiple locations
- Fluctuating inventory, too high or too low
- Inability to track inventory at the item level with bar coding

Achieve More Every Day

Sage 50 Quantum Manufacturing Edition helps you address manufacturing challenges by providing core accounting functionality combined with advanced manufacturing features powered by MISys. Get more done every day by using workflow capabilities that help you increase efficiency, be more cost effective, improve assembly processing, make inventory management more predictable, reduce delivery times and create greater customer satisfaction.

Sage 50 Quantum Manufacturing Edition features include:

- Extensive tracking of manufacturing inventory and work in process
- Multi-level bills of material with full explosion down to 16 levels
- Net-change physical inventory with cycle counting
- Batch-oriented or direct entry of all stock transfer transactions
- Full back flushing of all assembly transactions
- Choice of standard, average, LIFO, or FIFO costing methods
- Cost adjustment with roll-up through all BOM levels
- Stock check processing to identify impending shortages
- Work Orders to document and track production activity
- Configurable alerts on a personalized dashboard to show you critical events and status
- Additional modules to extend capabilities in Advanced Purchasing, Advanced Production, Material Requirements Planning and Production Scheduling, Serial/Lot Tracking, Bin Tracking, Shop Floor Control and Labor Tracking
- Multiple stocking locations
- Custom manufacturing reports
- One-year access to priority support, updates and upgrades[2] for your Sage 50 Quantum Accounting software
- Two-day live online training workshop

SAGE 50 QUANTUM MANUFACTURING EDITION COMES WITH SAGE BUSINESS CARE!

- Online Sage 50 Quantum Manufacturing Edition Basic Operations training workshop
- Priority access to additional online training workshops
- One year of unlimited access to Sage's highest level of Customer Support Analysts via phone and email[3] for your Sage 50 software
- All product updates and upgrades for your Sage 50 software that are released within 12 months of your purchase date[2]

Why Choose Sage 50 Quantum Manufacturing Edition?

Experience a new level of accounting and business management with the ease of use of an out-of-the-box solution—at an affordable price range. **Sage 50 Quantum Manufacturing Edition** enables you to manage all aspects of your business, including accounting, customers, inventory, services, jobs and employees – all in one centralized business management software solution.

Sage 50 offers **significant performance and depth of functionality** when compared to other small business products. And when compared to other mid-market solutions, you **don't pay thousands of dollars more for functionality you may not need or use**. Plus, you can avoid the cost of implementation, training, and maintenance you may incur by switching to an enterprise level solution. Sage 50 Quantum Manufacturing Edition is designed to grow with your business, accommodating from 5 to 40 licensed, named users.

Manufacturing Features brought to you by MISys

Sage 50 Quantum Manufacturing Edition provides all the features and functionality found in Sage 50 Quantum Accounting, plus the additional built-in power of MISys Manufacturing. These features include:

- Raw materials inventory
- Multiple stocking locations
- 16-level bills of material
- BOM revision control
- Engineering Change Orders
- Net-change physical inventory
- Stock check with auto-build
- Configurable alerts
- Cost adjustment with full roll-up
- Assembly back-flushing
- Production work orders
- Production calendar

For additional fees, you can have even more advanced features:

- Advanced Purchasing Module – Integrated purchasing, landed cost calculations, PO tax support, and multi-currency
- Advanced Production Module – Custom manufacturing orders

- Bin Tracking Module
- Serial/Lot Tracking Module
- MRP Module – Master production scheduling, material requirements planning, and available-to-promise prediction
- Bar Coding Module – Integrated bar coding software and one (1) laser scanner included
- Labor Tracking Module – Production time tracking, employee time sheet maintenance, and posting to jobs and production orders
- Shop Floor Control Module – Work center tracking, tool management, shop operations management, capacity management, and analyze production efficiency
