AD(H)D AND VISUAL SKILLS SYMPTOMS SURVEY

Parent’s Instructions: Please pose the following questions exactly as written. If your child responds with “yes”, then please qualify with frequency choices. Do not give examples.

Patient’s Instructions: Please answer the following questions about how your eyes feel when reading or doing close work.

Symptoms	Never	Not very often	Sometimes	Fairly often	Always
Do your eyes feel tired when reading or doing close work?					
Do your eyes feel uncomfortable when reading or doing close work?					
Do you have headaches when reading or doing close work?					
Do you feel sleepy when reading or doing close work?					
Do you lose concentration when reading or doing close work?					
Do you have trouble remembering what you have read?					
Do you have double vision when reading or doing close work?					
Do you see the words move, jump, swim or appear to float on the page when reading or doing close work?					
Do you feel like you read slowly?					
Do your eyes ever hurt when reading or doing close work?					
Do your eyes ever feel sore when reading or doing close work?					
Do you feel a “pulling” feeling around your eyes when reading or doing close work?					
Do you lose your place while reading or doing close work?					
TOTAL SCORE:	___ x 0	___ x 1	___ x 2	___ x 3	___ x 4

For children < 21 years of age, a **total score of 16 or greater is suggestive of visual skills delays that are contributing to AD(H)D-like behaviors.** If your child/patient scores a 16 or higher, please schedule an AD(H)D Visual Skills exam to investigate whether visual skills delays are contributing to AD(H)D.
