The Pitman Building

This is the building that is in the iconic photo of the “helicopter evacuations from the American Embassy.”
It was used by the CIA.

The Ky Son Annex BEQ as of mid-2014.
Little changed except for the Sony Center
and a fancier entrance on the side.

Mike McNally erroneously identified this
as the Plaza Hotel, BEQ.
It is actually the President Hotel.

This is between the Plaza and the Ky Son and just across the street. What wouldn't we have given for it to have been there in 1964-1973?

Hung Dao Theater (?)

The Metropole BEQ was just above it.

Photo taken by Dick Ellis. On October 20, 2015, he wrote: "The building right across from the Keyson was a movie...here is a photo of it taken from the sidewalk at front door of Keyson at my back.... The V in the road was to my left and the field hospital was on the left same side of the hotel. Next door was a service station which apparently has been torn down." It fact it was across the V-shaped intersection from the KySon and in the center of the "V" formed by Tran Hung Dao and Nguyen Cu Trinh.
