

High School Math Teacher I

Jefferson Preparatory High School, located in North Phoenix, offers a goal-oriented, classical college preparatory curriculum designed to prepare students for the rigors of college and the workplace beyond. JPHS believes in developing students both inside and outside the classroom by offering a diversified selection of sports and extra-curricular activities. Coaching and mentoring opportunities are also available for the interested teacher in these areas.

This primary assignment will be teaching Algebra I and Geometry. Preference will be given to applicants who have the education, background, and experience to instruct students in a variety of levels of mathematics or an array of technology based courses as electives. Experience and success with co-curricular is also highly desirable. The classes may include an honors component, thus you must be capable of producing projects/materials at a suitable level of complexity to challenge, engage and enrich honors students.

The most desirable candidate will possess a master's degree in the mathematics area as we look to expand to dual enrollment.

Full complement of benefits. Please complete application, attach resume, proof of highly qualified status, valid fingerprint clearance card, and three references. Incomplete applications will not be considered.

Job Types: Full-time, Contract
