PORTABLE VALVE TESTERS

Brief History:

Dunn's Valve Testers Inc have been manufacturing Valve Testers since 1978. We were the first to introduce valve testers and set the standard for all valve testing. We strive to maintain that level of Durability Value and Technology well into the future.

Our Valve Testers provide a method of accurately and speedily testing valves at a relatively low cost per unit and designed with the test operator in mind.

- **MODEL** -- This portable/mobile design gives the operator the ability of having the High-pressure Hydro (1000, 3000, 6000 and/or 10000 PSI) and air test capability at the work site.

Key Features:

- Uses 90 to 120 PSI shop Air and water supply 30 PSI, Inlet filters provides
- Regulated High Pressure Hydro test capability from 1000 to 10,000 PSI capability
- Regulated Air Pressure Hydro test capability from 100 PSI capability
- Quick connections for easy change out of test hoses
- USB digital gauge can be connected to the data port to create specific test reports

Standards - All Dunn's Valve Testers built to test valves in accordance with USA and International Standards – API 526 ; ANSI/API RP 576 ; API 520 & 527

Delivery – Approx. 4 to 6 work weeks

Start Time - based on payment terms being agreed and complete technical specifications.

Guarantee – All parts, machined parts for 12 months

DVT Range of Testers – Relief Valve; Control Valve; Vertical and Horizontal Press; Roll Frame; Portable

NOTE: Each unit is adapted and built to specific client requirements
