# The Competition

*The Wing Slide-Loc® Coupling . . .  
revolutionary design and ultra-precise manufacturing  
produce this exclusive breakdown system*

The design of the exclusive Wing Slide-Loc® Coupling is as unique as it is functional.

The bow sets up simply by inserting the limbs into the slide on each end of the handle.

The limbs snap into place—no screws, bolts or pins—and the limbs stay in place, for as long as you want.

Stringing and un-stringing the bow may be done easily with a bow stringer.

Once the bow string is removed, breaking down the bow is as simple

as it was to put it together. The limbs pull out of the handle easily.

While this exceptionally simple breakdown bow design is revolutionary and unique enough to cause excitement in the archery field, the precise manufacturing methods used to produce the system are also of great importance.

The precision machined handle is of light magnesium, while the limb wedges are stainless steel. This means that bow weight is distributed towards the ends of the handle,

contributing to increased stability when shooting.

Production techniques allow perfect "natural" alignment of limbs in addition to the quick assembling and breakdown characteristics of the system.

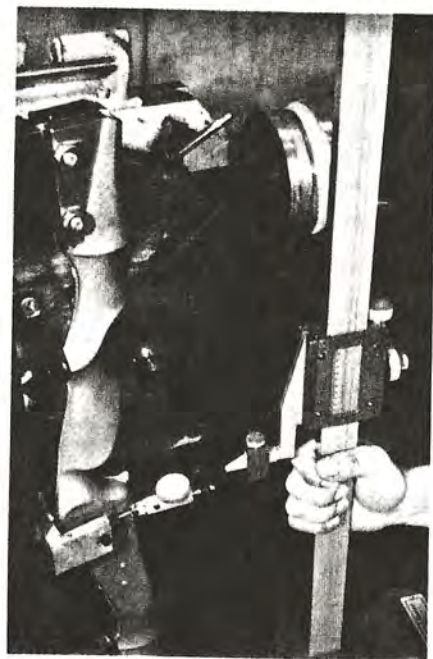

Exclusive Wing Slide-Loc® Coupling—a revolutionary breakthrough in bow design.

*Milling of the handle is performed to close tolerances, an extremely accurate operation.*

*Joining of limb wedges and handle cut-out is checked to assure a perfect match.*

*This is one of many quality control checks made on the Wing Slide-Loc® system.*

**SLEEKNESS COMBINED WITH  
WING'S EXCLUSIVE SLIDE-LOC®  
COUPLING CONVENIENCE**

The Competition II bow has always been the most exciting, innovative bow in the Slimline group, but this year its increased versatility makes it a must for every expert archer. By utilizing various options available, the archer can create just the right bow for his or her needs.

The distinctive Slide-Loc® coupling allows easy, quick and convenient change of limbs. The handle of the Competition II Target is all new and lighter so that archers can now add weight according to their personal preferences. Aluminum limb wedges have been made standard on the Hunter model and optional on the Target model to further lighten the bow.

For the competition archer, the handle of the Target model has been refined by young Olympic Gold Medalist John Williams for use by those who prefer a high-wrist style of shooting. The three limb lengths and two handles offer a choice of four target and four bow lengths\* plus a wide choice of options to further ensure the versatility of the Competition II.

All this adds up to a bow which any professional or expert amateur archer will enjoy using for years to come.

\*Some lengths available on special orders only.

I have tried a lot of different bows since winning my first national competition, but I can honestly say that the Competition II is the finest bow I have ever used. Now with my re-designed handle, I think you will agree that the High-Wrist Competition II will give the best performance you've ever had on the target range.

*John C. Williams*

**[A] COMPETITION II TARGET** <sup>\$210</sup>

Olympic Champion John Williams has done more than simply place his signature on this extraordinary bow. He has also aided in the re-design of the high-wrist handle so that it is now the perfect target bow for those who prefer a high-wrist style of shooting. The inclusion of the high-wrist feature enhances the versatility of the 1974 Competition II Target bow, as it is also available as a low-wrist standard bow.

Standard items include ~~a padded vinyl case (specify long or short)~~ stabilizer and counterbalance inserts, Wing cushion plunger, flip rest, bow stringer and professional string with monofilament serving.

Options include the new aluminum limb wedges, stabilizer, sight extension, and counterbalance weight. The Target model is available in glossy white, black or red.

AMO lengths: 66", 68" and 70".  
Weights: 25 to 50 lb.

Catalog order: **160.** (complete)

<sup>\$100.00</sup>**161.** Handle (only).

<sup>\$110.00</sup>**162.** Limbs (only). Specify length.

**854.** Stainless steel wedges, pair, and aluminum wedges, pair. Specify.

**[B] INTERNATIONAL** <sup>\$95.00</sup>

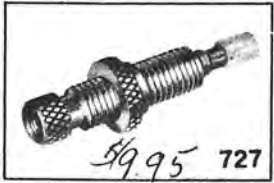

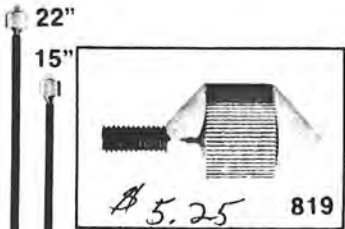

For those who prefer simplicity, the International is a bow that gives all the design features of the best in tournament bows. Standard equipment includes inserts for Wing's stabilizer and counterbalance weight and flip rest. By popular demand, the International is now available in AMO 66" and 70" lengths and in 25-pound to 50-pound weights.

Catalog order: **165.**

**[C] CORSAIR** <sup>\$65.00</sup>

This fine-quality Wing bow was specially designed for indoor lanes. It is also ideal for other forms of recreational and competitive archery. It's a top-grade target bow but available at a lower price. Manufactured to exacting Wing Archery standards, the Corsair features an exotic hardwood riser section with full working recurved limbs, a full sight window, stabilizer insert and sight adapter. AMO length is 66". Available in 20, 25, 30, 35, and 40-lb. weights.

Catalog order: **166.**

\$13.50 816. **STABILIZER SET.** One rod and one weight. Specify length: 22", 15", 10".

\$8.25 817. **ROD.** Specify length: 22", 15", 10".

\$5.25 818. **WEIGHT.** 3-3/4 oz.

\$5.25 819. **WEIGHT.** 6 oz.

820. **INSERT.**

727. **WING CUSHION PLUNGER.** Adjustable for windage and plunger spring tension. Most popular tuning aid for the precision shooter.

806. **WING SIGHT EXTENSION.** Easily mounted on side of bow. Can be extended forward or backward. Has vertical adjustment to align sight with bowstring. A must for tournament shooters who want perfection.

860. **NEW CAVALIER PROFESSIONAL SIGHT.** New professional-model sight allows for extremely easy movement of sight block, with positive locking. Fine adjustment for both elevation and windage. Spring-loaded to prevent accidental movement. Spring-loading is adjustable. Comes

with pin and level. Fits Wing Sight Extension without adapter plate.

861. **SIGHT BAR.**

862. **SIGHT BLOCK.**

863. **APERTURE AND LEVEL.**

540. **STABILIZER ADAPTER BOLTS.** Allow for twin stabilizers on Competition II limb. Tapped to receive stabilizer.

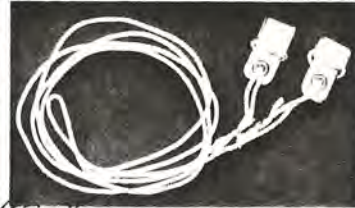

\$15.00 406. **PADDED BOW CASE.** Leather-grained vinyl with 3/8" padded lining. Carrying handle. Specify length: 52", 62" or 66". (66" case will accommodate bows to 72".)

\$3.75 407. **FLANNEL BOW CASE.** Durable flannel with soft nap finish. Tie-down flap is 6" wide. Specify length: 63" or 72".

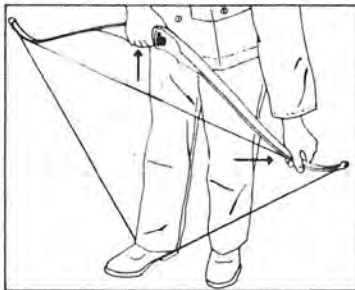

\$20.00 409. **PADDED VINYL CARRYING CASE.** An attractive zip-up case made especially for the Competition II. Handily holds one set of limbs and one handle. Pockets provided for stabilizer and bowsight.

\$16.50

501. **WING BOW QUIVER.** The most popular bow quiver made. Light in weight. Rugged enough to last a lifetime. This quiver is rapidly becoming the standard of the industry. Made of aluminum and nylon, the unique design makes arrows rattle-proof. It won't scratch, mar your bow or interfere with shooting. The arrow clamp securely holds six arrows of any size. Right- or left-handed archers can use the same quiver. The Wing Bow Quiver is easy to attach and load. Keeps arrows right at hand for quick, smooth take-out. Comes with adjustable sliding brackets to attach to any Wing hunting bow in seconds. Also comes with tape-on pads for all other bows.

716. **WING BOW STRINGER.** A must for any archer. Insures safe bow stringing. Prevents limb twisting while protecting archer. String heavy bows with ease.

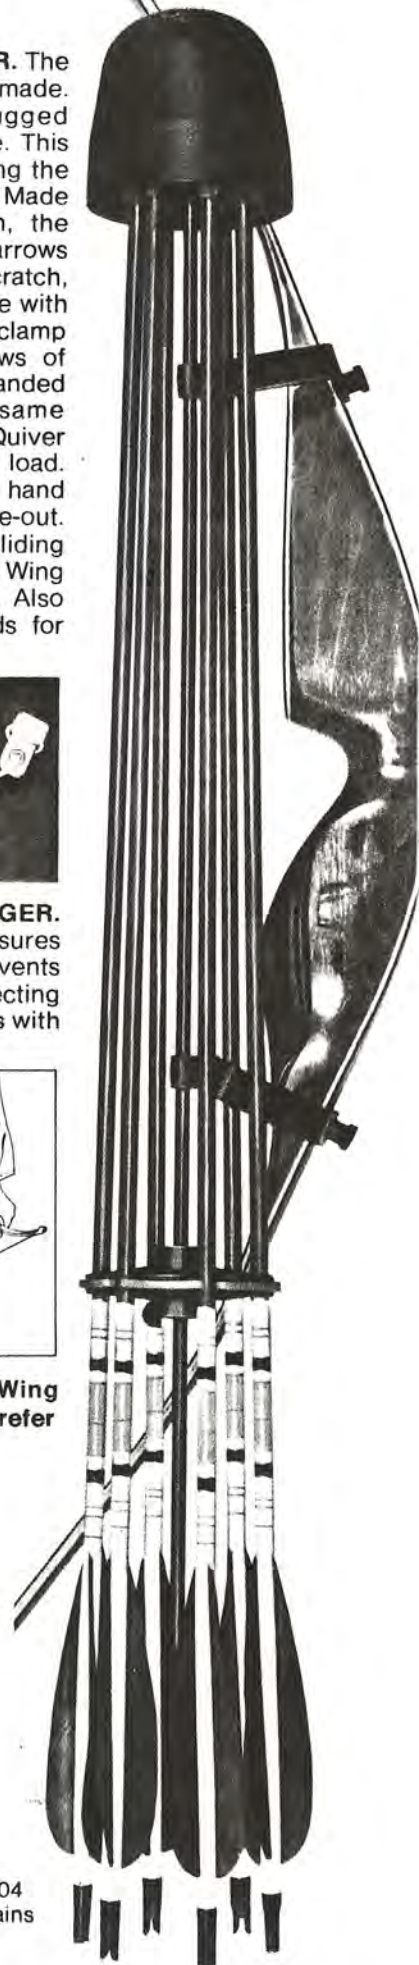

For information on Wing arrows and accessories, refer to Wing's 1974 Catalog.

This AMO 58" hunter sets new standards of excellence for the discerning bowhunter. It combines a high-density WINGWOOD® riser with Slimline action and new limb design. The Red Wing Pro has built-in bow-quiver inserts. Stabilizer inserts and sight adapter are included as standard equipment. Stocked in 40, 45, 50 and 55 lb. For 35, 60, 65 and 70 lb., please allow additional delivery time.

Catalog order: **169.**

**WING WARRANTY**

All Wing bows are warranted by Wing's famous three-year guarantee.

**All specifications are in accordance with standards of the Archery Manufacturers Organization.**

I believe that serious archers everywhere will be as excited as I am by the presentation of the 1974 Slimline series. Wing has always led the field in creative concepts in archery equipment. But this year, we offer even more. The Competition II with the Slide-Loc® coupling, the most innovative takedown bow on the market, continues to give you the advantage of easy changeability. Added to this feature, you will find more choice in optional equipment to make the bow fit you. I feel you will be as excited as I am over the developments which have come about through the work of John Williams, 1972 Olympic Gold Medal Winner, who serves as Chief Advisor for the target shooting equipment.

Let this year be the year you swing to Wing for the fun *and versatility* of it.
