FloorLiner™ DigitalFit®

In the quest for the most advanced concept in floor protection, the talented designers and engineers at MacNeil Automotive have worked tirelessly to develop the most advanced DigitalFit® floor protection available today!

The WeatherTech® FloorLiner™ DigitalFit® accurately and completely lines the interior carpet giving "absolute interior protection™"! The WeatherTech® FloorLiner™ DigitalFit® lines the interior carpet up the front, back and even up the sides of the vehicle's footwell. Digital laser measurements of interior surfaces offer a consistently perfect fit!

A patent pending High-Density Tri-Extruded (HDTE) material allows for a rigid core for strength while offering surface friction to the carpet, as well as tactile feel to the surface! Advanced surfacing creates channels that carry fluids and debris to a lower reservoir with further channeling to help minimize fluid movement while driving! Once fluids become trapped in the reservoir, away from shoes and clothing, they are easily removed from the WeatherTech® FloorLiner™ DigitalFit® over the door sill. No muss-no fuss!

WeatherTech®, where Technology and All Weather Protection meet!

Rear FloorLiner™ DigitalFit®

Rear FloorLiner™ DigitalFit® incorporates many of the same design features as the front FloorLiner™ DigitalFit®. Rear FloorLiner™ DigitalFit® (where offered) is manufactured from a proprietary custom blended TPO (thermopolyolefin) that is not only wear resistant, but also remains flexible under extreme temperatures. Rear FloorLiner™ DigitalFit® is either one piece or two piece depending on the vehicle application.
